CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is OASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

The Kind You Have Always Bought

In Use For Over 30 Years.

PELLAGRA ITS LESSON.

The importance of pellagra as a disease was brought to the newspaper reading public last week when this obscure malady claimed for its victim one of the best known editors of our State. John M. Julian, editor of the Salisbury Post, was a public spirited man, and a man whose life, taken at the very meridian of its usefulness, was of great value as a public asset.

A terrible disease! Like some wild beast of the jungle that emerges under cover of darkness, seizes its victim, and escapes without being seen, so pellagra, of unknown origin and destined to strike next we know not where, continues to levy its deadly tax on the public health. And now, direct your sympathetic attention to the unfortunate victim: Suffering from a disease of fatal tendency, with its true nature unknown, he adds to his physical suffering the mental unrest of the fear that the hidden cause of the disease may even then be lurking in his home to drag down some other member of the family. Repeat this tragedy a thousand times, and you have a mental picture of what pellagra means to North Carolina in one year.

Since the first day of January, 1910, to September 1, 1910, there were reported through carefully collected, official death certificates now on file in the office of the State Board of Health, 70 deaths from pellagra. Our records do not extend beyond January. Now 70 deaths in eight months means an average of 8 2/3 deaths per month, or for twelve months 105 deaths. Our registration law covers the State one fourth the population of the State.

For the whole State we would then multiply the 105 by 4, which would make 420 deaths per year. Now, consider one more fact in making our estimate, namely, that the disease is new, and not more than one doctor in six or eight is yet able to recognize it. This simply means that a very large number of deaths from pellagra are unrecognized as such. Assuming that only as many deaths from the disease are unrecognized as are recognized, we are very probably near the truth in placing the estimate at about 1,000 deaths a year.

All this is a warning. Is pellagra spreading in our State? We don't know. Most authorities believe it is. Can it spread? We answer by quoting some figures given by Dr. Ed. J. Wood of Wilmington, in a paper on the disease:

"In 1879 the number of cases in Italy was 97,855. About this time in Venetia, among 10,000 deaths 500 were due to pellagra. Since 1881 the number has declined materially, supposedly owing to the strenuous efforts on the part of the Government in the more careful inspection of Indian corn and in the improvement of the general hygienic conditions. Next to Venetia stands Lombardy, with 300 deaths, then Emilia, with 200 deaths. Piedmont, Umbria, and Tuscany attribute over 5 per cent of all the deaths to pellagra. Neusser asserted that in 1886 in Venice, with a population of 365,588 natives, there were 1,086 cases of pellagra.

"In Roumania in 1885 there were 10,626 cases; in 1886, 10,797 cases out of a population of 5,300,000. In 1892 there were 4,500 cases, in 1898, 21,272 cases. Triller says that in 1906 in Roumania there were 30,000 pellagrins."

Then it did spread in other countries. It is a serious disease, and in itself is a strong argument for a better equipped State Board of Health than one whose total revenue from all sources does not amount to over \$12,500.

But after all, there is something of inconsistency in all the newspaper excitement over this new disease. Why discuss the needs for knowing the means of preventing pellagra, when we know how to prevent tuberculosis, hookworm, malaria, typhoid fever and other diseases, all of which, taken together, destroy ten or twelve lives while pellagra takes one? Let us use what knowledge we have. Let us have a public health department adequate to investigate pellagra and, what is much more needed, to teach the people the life saving facts already available.

Let no one misinterpret the meaning of these facts. North Carolina is just as healthy as any other South-

THE AUTOMOBILE.

It is rather a relief to turn from the subject matter of the number of automobiles that are bought under mortgage, to the actual facts as to the growth of this remarkable industry. We find some facts in The Christian Herald that are of interest.

That paper says so rapid is the growth of the automobile industry that it is impossible to put an exact estimate on the valuation of the capital invested, but a conservative estimate places it at \$500,000,000. In this vast total not less than half represented moderate and low priced machines, whose enormous sales—a ratio of six to one—are not trumpeted like those of the high priced autos. About 200,000 persons are employed in the manufacture of automobiles and accessories. Between \$25,000,000 and \$30,000,000 is paid for freight to the railroads by the automobile companies annually. The annual consumption of steel, iron, aluminum and rubber is valued at over \$6,000,000.

Automobile manufacturers affirm that the auto has dispensed with the services of 500,000 horses and wagons up to date. They also give the broad general estimate that the average upkeep of a horse and wagon is sixty five cents a day, while that of the average motor car is only 30 cents a day. We are rather inclined to believe that some of the auto owners in Charlotte will challenge this last statement. Many of them would feel fine if their automobile bill would not average more than 30 cents an hour, much less a day—Charlotte Chronicle.

The Home Beautiful.

Every family takes pride in the home that is well painted with the L. & M. Paint. One coat only beautifies and also adds value and increases its saleable chances. The L. & M. colors are bright and lasting. The L. & M. is used by every body who studies economy, and uses the very best at the least cost. Cost only about \$1.30 per gallon when ready-for-use. It is Metal Zinc Oxide and Lead combined. It wears and covers like gold. Sold by Geo. O. Goodman & Co.

Miller Happenings.

People are getting out cotton fast in this section. About time for corn chukings.

C. L. Sherrill has been sick for the last week with malarial fever but is somewhat improved at this writing.

Mrs. D. A. Barkley, Mrs. Julia May McGrath and Mrs. Tyrone Barkley, of Charlotte, are visiting relatives around Miller this week.

Mr. G. H. Sherrill returned to Charlotte today.

Mr. and Mrs. S. L. Hager spent Sunday with C. L. Sherrill.

Misses Robie Barnette and Della Sherrill visited Mrs. Ross Caldwell Saturday night and Sunday.

Mrs. J. W. Nixon spent Tuesday with Mrs. Joe Byers, also the Mrs. Barkley's and Mrs. McGrath, of Charlotte.

Mrs. Emma Sherrill spent three or four days visiting at Cornelius last week.

Mrs. Ed Miller returned to Charlotte last week after spending the summer at Miller.

Miss Mable Miller, who has been right sick with malarial fever, is better.

There are some opossums around Miller. The boys caught one Tuesday night, which weighed 15 pounds.

Kills a Murderer.

A merciless murderer is Appendicitis with many victims. But Dr. King's New Life Pills kill it by prevention. They gently stimulate stomach, liver and bowels, preventing that clogging that invites appendicitis, curing constipation, headache, biliousness, chills, etc. at Miller-White Co., and Geo. C. Goodman & Co.

A lively scrap took place in Raleigh last Saturday, when State Senator W. B. Jones attacked Josephus Daniels, editor of the News and Observer. Jones struck the newspaper man in the face and a tussle ensued, being separated before any further damage was done. Daniels said things in his paper that Jones took exception to, and sought redress by the fogging route.

ern State—in fact, we have a death rate slightly higher than the average death rate in the United States. We are to be congratulated on the fact that the very large proportion of our diseases are preventable diseases; but as the people, if we do not arouse ourselves from our indifference in matters of public health, we shall deserve the penalty of sanitary indifference and ignorance—disease and death.

And, if there be those who believe in placing the candle under a bushel, who believe in withholding from the public the knowledge of the presence of disease until it is hurtful to interpret the meaning of these sanitary facts for the people, may we seriously inquire of them, by what other means we may arouse the public to a proper sense of its obligations of publicity the writer is best wedded. Our motto, in so far as in us lies: "Ye shall know the truth, and the truth shall make you free."

TAXABLE VALUES IN IREDELL.

Mr. A. D. Watts, who recently finished the work of making out the tax books for Iredeed, furnishes the following interesting information about tax values in Iredeed:

The total value of real and personal property this year is \$10,405,221.42, an increase of \$244,435.01 over last year. The number of polls returned this year is 4,850, which is 56 less than last year. Number of acres of land, 362,148, a loss of 3,940 acres as compared with last year. The number of acres of land varies every year and just how the amount can diminish or increase is one of the unsolved mysteries. But while there is less land, according to the tax books, the value is increasing. This year the value is \$2,612,532, a gain of \$4,082 over last year. The number of town lots is 2,995, a loss of 78, but the value of the lots is \$2,098,465, an increase of \$97,200 over last year. It will be noted that the value of town lots is well up toward the total value of the land in the county and that the increase in the value of the real estate makes up a large part of the increase in the tax values.

There are returned for taxation 3,590 horses, \$7 less than last year, of the value of \$269,001, a gain in value of \$13,244; mules, 3,896—74 less than last year; value, \$306,545, an increase of \$15,260. It will be noted that Iredeed is stronger on mules than on horses. Jacks and jennets, 13, an increase of 1; value \$865, an increase of \$230; goats, 224—gain of 30; value, \$22—\$48 gain; 11,771 cattle, loss 411, valued at \$155,399, a gain of \$9,200; 11,692 hogs, a gain of 1,082, valued at \$47,957, an increase of \$7,255. It's comforting to note the increase in the number of hogs. Maybe after a time we'll quit importing meat. Of sheep there are 922, a loss of 48, and the value is \$1,044, a loss of \$54. The surprise is that any sheep are left, seeing that the dogs are protected while the sheep are not, but the dogs don't shine on the tax lists. There are 370 returned, three more than last year, but the value is only \$2,548, which is \$293 less than last year.

Turning from realty and live stock, we find the number of bicycles is 73, six less than last year, while the value is \$786, \$60 more than last year. Farming utensils are valued at \$81,141, an increase of \$8,404 over last year, and not a big increase when one considers the constant additions of valuable farm machinery; tools of mechanics, \$8,256, a gain of \$402. But in household and kitchen furniture and provisions were poorer than last year. The value of the former is \$198,109, a loss of \$319; provisions \$47,132, a loss of 10,890. If the loss in the value of provisions is actual and not imaginary, it's a poor advertisement for the county, for it means that instead of having the provisions on hand the folks have them to buy. Of course the value of household and kitchen stuff hasn't actually decreased; that's one of the fictions of the tax returns and one of the chief sources of perjury is the value the average citizen places on his household and kitchen furniture.

But while we have less to eat and less furniture in our homes, we have a few less shooting irons. The value of the firearms is \$9,542, a loss of \$61; scientific instruments, \$1,581, a loss of \$159. Money on hand, \$22,566, a loss of \$40,610. My, but we're getting poor here—more than \$40,000 less cash on hand and nearly \$11,000 decrease in provisions in one year! But the bank deposits hold up mighty well and we've got more solvent credits and admit it—\$876,883, a gain of \$61,194 over last year. This about makes up for the loss of money on hand and the provisions, and means that we've sold our surplus provisions and loaned our money. This sounds better.

We've got rid of a good many stocks and bonds the past year or they've shrunk in value. The amount this year is \$4,135, a loss of nearly one-half—\$4,125. But here are some increases worth while: Cotton, \$154,356, a gain of \$54,589; tobacco, \$16,611, a gain of \$1,568; musical instruments, \$60,320, a gain of \$6,044; silverware, \$4,901, a gain of \$496; watches and jewelry, \$23,318, a loss of \$750 (not sporting as much as formerly); merchandise, \$612,266, a loss of \$5,027; stock in private banks, \$2,200, a loss of \$2,330; all other personalty, \$572,309, gain of \$67,290, total per-

sonalty, \$3,479,993, a gain of \$179,656; total real and personal property, \$8,190,990 an increase of \$280,948.

Building and loan stock, \$71,551, loss of \$29,475; corporation excess, \$72,685; loss, \$48,200; local telephone property, \$29,046; gain, \$3,282; bank stock, \$342,233.95; gain, \$19,919.60; public service corporations, \$1,698,715.47; gain \$17,960.42. Incomes returned for taxation this year amount to \$52,566, a loss of \$1,069.

TOWNSHIP TOTALS.

Seven of the 16 townships in the county show a loss in the total valuation of taxable property. These are Bethany, Concord, Cool Spring, New Hope, Olin, that part of Statesville township outside the town of Statesville, and Turnersburg. All the others show a gain. The totals in each township and the gain and loss is as follows:

Barringer, \$200,222.50; gain \$2,492.43; Bethany, \$177,227; loss, \$2,443.35; Chambersburg, \$253,545; gain, \$1,733.63; Coddle Creek, \$1,760,736.29; gain \$141,206.08; Concord, \$248,239; loss, \$7,392.03; Cool Spring, \$181,870; loss \$5,130.89; Davidson, \$339,451; gain, \$3,245.06; Eagle Mills, \$162,441.49; gain, \$583.84; Falls town, \$342,385; gain, \$50,000.55; New Hope, \$100,192; loss, \$3,877.37; Olin, \$309,969; loss, \$5,658.12; Sharpesburg, \$228,959; gain, \$2,016.22; Shiloh, \$383,338.55; gain, \$11,202.72; Statesville (outside) \$963,599; loss \$48,992.07; Statesville (inside), \$2,724,414.50; gain, \$87,118.86; Turnersburg, \$258,401.02; loss, \$1,462.47; Union Grove, \$155,618; gain, \$1,533.83.

The gain in Coddle Creek township, which includes Mooresville, is remarkable—\$141,206.08. The loss of \$48,992.07 in Statesville township outside of Statesville is hard to account for and if this is deducted from the increase of \$87,118.86 in the town of Statesville, the result is only \$38,126.99 gain for the township. The largest gain in the rural townships is that of Falltown—\$50,000—and the building of the Turner Cotton Mills at East Monro is responsible for much if not all this. A gain of more than \$11,000 in Shiloh shows a healthy growth. The largest loss in the rural townships is in Concord, which has dropped \$7,392.03; Olin is next with \$5,658.12, and Cool Spring third with \$5,130.89.

The township list-taker is often responsible for the gain or loss. If he expects himself to execute the law, to get all the property on the tax books at proper valuation, the difference will be appreciable. While on the other hand if he takes only what is offered at the figures named, a decrease is not surprising.—The [Landmark]

STATE NEWS.

At Garner, early Thursday morning, a pair of mules driven by Alfred Stevens, a well known farmer of Shiloh church, near Clayton, became frightened at an unidentified automobile and bolted. Stevens was caught under the wagon and dragged two miles. He was dead and horribly mangled when extricated from the demolished wagon.

Miss Betsy Cruse, a well known citizen near Spencer, lies unconscious at her home as a result of being struck in the head by a windlass Wednesday afternoon. She was drawing a six gallon bucket of water when her hand slipped off the crank and she was struck a terrible blow in the forehead with the handle, her skull being fractured. She fell unconscious to the ground, eight feet distance, and her condition is hopeless.

The announcement is made by State Chairman Eller that Mr. R. F. Beasley, of Monroe, will be with democratic headquarters from October 4 until after the election. He will have charge of the publicity matter of the campaign, writing and editing the literature, etc. He will also assist in the correspondence and with his counsel aid the chairman in the general work of the committee.

Effective with the first car leaving Richmond, Va., Tuesday, October 4th, the present Salisbury and Memphis sleeping car line will be extended and become a Richmond and Memphis line. Cars will be handled between Danville and Richmond on trains Nos. 13 and 14 and between Greensboro and Memphis on trains No. 35 and 36. Passengers can therefore make the trip through from Greensboro to Memphis without the necessity of changing cars, and can also go through to Richmond, leaving there on No. 36 without changing cars.

"It Beats All"

This is quoted from a letter of M. Stackwell, Hannibal, Mo. "I recently used Foley's Kidney and Bladder Pills for the first time. To say I am pleased does not half express my feeling. It beats all the remedies I ever used. I contracted a bad cold and was threatened with pneumonia. The first doses gave great relief and one bottle completely cured me." Contains no opiates. Miller-White Co.

B. F. Dixon, Jr., Appointed.

Governor W. W. Kitchin on last Thursday commissioned Ben F. Dixon, Jr., as State auditor to succeed his father, the late Hon. B. F. Dixon, whose death on Monday night of last week left the office vacant. Mr. Dixon, who has assumed the duties of the auditorship, is a young attorney of ability and will doubtless carry on the work of this important office most worthily.

sonalty, \$3,479,993, a gain of \$179,656; total real and personal property, \$8,190,990 an increase of \$280,948.

Building and loan stock, \$71,551, loss of \$29,475; corporation excess, \$72,685; loss, \$48,200; local telephone property, \$29,046; gain, \$3,282; bank stock, \$342,233.95; gain, \$19,919.60; public service corporations, \$1,698,715.47; gain \$17,960.42. Incomes returned for taxation this year amount to \$52,566, a loss of \$1,069.

TOWNSHIP TOTALS.

Seven of the 16 townships in the county show a loss in the total valuation of taxable property. These are Bethany, Concord, Cool Spring, New Hope, Olin, that part of Statesville township outside the town of Statesville, and Turnersburg. All the others show a gain. The totals in each township and the gain and loss is as follows:

While on the other hand if he takes only what is offered at the figures named, a decrease is not surprising.—The [Landmark]

Why does Great Britain buy its oatmeal in U.S.?

Certainly it seems like carrying coals to Newcastle and yet, every year oatmeal to Scotland and yet, every year the Quaker Oats Company sends coats to Newcastle to speak of export quantities. The reason is simple: while the English and Scotch have for centuries eaten oatmeal in quantities and with a regularity that has made it a staple of their diet, the Scotch and English Quaker Oats to Great Britain and Europe.

The reason is simple: while the English and Scotch have for centuries eaten oatmeal in quantities and with a regularity that has made it a staple of their diet, the Scotch and English Quaker Oats to Great Britain and Europe.

HOW TO CURE RHEUMATISM

It Is an Internal Disease and Requires an Internal Remedy.

The cause of Rheumatism and kindred diseases is an excess of uric acid in the blood. To cure this terrible disease this acid must be expelled and the system so regulated that no more acid will be formed in excessive quantities. Rheumatism is an internal disease and requires an internal remedy. Rubbing with Oils and Liniment will not cure affords only temporary relief at best, cause you to delay the proper treatment, allows the malady to get a firmer hold on you. Liniments may ease the pain, but they will no more cure Rheumatism than Paint will change the fibre of rotten wood.

Science has at last discovered a perfect and complete cure, which is called "Rheumajole." Tested in hundreds of cases, it has effected the most marvelous cures; we believe it will cure you. Rheumajole "gets at the joints from the inside," sweeps the poisons out of the system, tones up the stomach, regulates the liver and kidneys, and makes you well all over. Rheumajole "strikes the root of the disease and removes its cause." This splendid remedy is sold by druggists and doctors generally at 50c and \$1 a bottle. It is obtainable from 25 and 50c a package. Get a bottle today. Booklet free if you write to Bohitt Chemical Co., Baltimore Md. Trial bottle tablets 25c by mail. Sold in Mooresville by Miller-White Co., and Geo. C. Goodman & Co., and by druggists generally.

Capt. Bogardus Hits the Bull's Eye
This world famous rifle shot who holds the championship record of 100 consecutive shots is living at Lincoln, Ill. Recently interviewed, he says: "I suffered a long time with kidney and bladder trouble and used several well known kidney medicines, all of which gave me no relief until I started taking Foley Kidney Pills. Before I used Foley Kidney Pills I had severe backaches and pains in my kidneys with suppurations and a cloudy voiding. On arising in the morning I would get dull headaches. Now I have taken three bottles of Foley Kidney Pills and feel 100 per cent better. I am never bothered with my kidneys or bladder and again feel like my own self." Miller-White Co.
