"We have a ready market for all we can collect," Artz said, "and it is vitally needed. Schools are receiving approximately one-half a cent per pound for all the paper they collect. Help your school earn this money by sending or bringing your waste papers—and especially magazines—to the depots."

## More Tobacco and Peanuts To Be Harvested In 1944

Substantial increases in tobacco and sweet potato acreages over the acreages harvested last year are predicted in the March report of the Crop Reporting Service of the State Department of Agriculture. Moderate increases in peanuts, corn, oats and hay are indicated, the report indicates.

Early spring farm plans are always subject to changes caused by weather conditions, availability of labor, supplies, and equipment, the report points out. "It appears that

Estimations by agricultural experts that tobacco and peanut acreage in North Carolina will be increased during 1944 holds true for Gates county in tobacco but not in peanuts, according to statements made Monday by John Artz, county farm agent.

Artz estimated that nearly 350 acres of tobacco would be produced in Gates county this year. The increase in the tobacco acreage will be made by the old growers taking advantage of the 20 percent increase granted them this year. There are no new tobacco growers in Gates county for 1944.

Planted peanut acreage will be about the same this year as last, Artz said, but hopes for a larger yield are being held. Last year 13,299 acres of peanuts were planted as compared to approximately 12,499 acres harvested.

farmers plan to operate at the full capacity of labor and equipment, and any changes from early March plans—either intentional or unintentional—would be more likely to result in smaller acreages than now planned, rather than in large acreages."

A shortage of farm labor is a general complaint, the report states. Frequent and heavy rains have delayed field work.

### More Tobacco

The report highlights follow: Tobacco — March 1 planting plans point to an increase of approximately 100,000 acres in flue-cured tobacco, or 18 percent more than grown in 1943.
