Our Country Needs Still More Used Fats ... and We're the Folks to Save Them!

OUR domestic supplies of fats and oils will be approximately one and one-half billion pounds less than last year. Yet thousands of tons are still needed to help make countless essentials for the battle- and home-fronts.

We country people must remember that because of the meat situation, we are in a better position to save fats than city folks. That's why we can't afford to miss a trick!

So let's save not only the big amounts from frying and roasting, but also meat trimmings and plate scraps. Melt them down and add the liquid fat to the salvage can. Skim soups and gravies. Every drop is important.

When your salvage can is full, take it to your butcher and get 2 red points and up to 4¢ for each pound. If you have any difficulty, call your County Agent or Home Demonstration Agent.

100,000,000 More Pounds of Used Fats Are Needed This Year!
