MADISON.

Madison's school opened Monday morning with the largest attendance in its history. Many of the parents and friends of the school were present to witness the exercises, and the term bids fair to eclipse all others.

T. R. Pratt and Dr. J. T. Taylor returned from Baltimore the latter part of last week, where the former went to consult a specialist. Mr. Pratt was advised to return to Baltimore and undergo treatment for a term of three weeks, the specialist promising to have him in "ship-shape" at the end of that time. Many friends will be pleased to learn that the prospects for an early recovery are so bright, and hope that he will soon be with us again hale and hearty.

The electric light question for Madison has been revived and it is more than probable that something will yet result within the near future.

THERE IS A BIG DEMAND FOR MALE STENOGRAPHERS

Concerning the male stenographer the Omaha Examiner has this to say: The government seems to have difficulty in securing male stenographers.

A recent circular states that nearly 200 appointments are soon to be made. To get them, examinations will have to be held all over the country, September 12 to 26. But while applicants for other civil service appointments are sleeping on the doorsteps of their Congressmen no rush of candidates for this position is expected. What has become of the male stenographer?

News-paper reporters are asked almost every day if they are familiar with shorthand. This is because the public conceives of a reporter as spending much of his time in taking down long reports of speeches. In actual practice the reporter soon finds that he can get down in long hand four times as much as his paper will print. Few men in this business ever find it worth their while to acquire stenography.

In mercantile and manufacturing lines few fellows consider it of any large use. To an ambitious man knowledge of shorthand might even prove a detriment. It would tend to keep him at merely clerical work when he ought to be out getting his hands dirty while he was learning processes and materials.

Probably the government, like private enterprises, will have to depend more and more on women for stenography. The limitations that custom still throws about women's work makes this field particularly popular. There are many capable girls who would like to plunge into the heart of a business in overalls and jumpers like their brothers. But society would be shocked. They are not yet ready to defy society.

So the girls will undoubtedly monopolize this field, or nearly so. They will crowd it too full, thus keeping down the rates of payment. This drives out of the business the man whoever expect to support a family. No wonder Uncle Sam must ransack the country to find his 200 expert shorthand men.

Chamberlain's Colic, Cholera and Diarrhoea Remedy.

This is a medicine that every family should be provided with. Colic and diarrhoea often come on suddenly and it is of the greatest importance that they be treated promptly. Consider this suffering that must be endured until a physician arrives or medicine can be obtained. Chamberlain's Colic, Cholera and Diarrhoea Remedy has a reputation second to none for the quick relief which it affords. Obtainable everywhere.
