LEAGUE PLANS TO WIPE OUT THE PESKY ENGLISH SPARROW

The League of American Sportsmen, whose object is the preservation of wild life, is considering the question of inaugurating a nation wide campaign for the destruction of the English sparrow. Its officials say this bird has made such headway here that it is driving out the smaller song and insectivorous birds and that it has become a question of whether we will have only the English sparrow to represent our bird life or destroy it and regain some fifty species of useful and beautiful birds that used to inhabit farms and countryside all over the land.
The league intends to issue a proclamation declaring war on the English sparrow and setting aside a week, possibly in April or May of next year, to be devoted especially to waging it. The governors of every state will be asked to add the work. Printed instructions as to the plan of the campaign will be sent to the mayors of all incorporated cities and villages, to the heads of the school systems in every county, to college presidents, to principals of preparatory schools, to the heads of the boy scouts in each state and to other organizations which might be expected to extend sympathy and aid.
Methods of Fighting Winged Pest.
Four principal methods of action will be employed: Tearing down the nests, trapping the birds, shooting them under police supervision and under licenses issued by the police authorities and, in cities where water pressure is available, turning the hose on the birds at night after they have gone to roost.
The president of the league, G. O. Shields, of 1110 Simpson street, New York, says he would like to hear from persons interested in the matter, both those who favor the plan and those opposed.
He makes the statement that in the case of the hundreds of thousands of bird boxes placed in this country in the last ten years, fully 75 per cent have been appropriated for their own purposes by the English sparrows. In cases where bluebirds, wrens or other birds that are desired by those who put the boxes up have taken possession of boxes, the sparrows have driven them out, thrown their eggs to the ground, and taken full possession themselves.
Bluebirds Driven Out.
"I have traveled nearly 4,000 miles this summer," says Mr. Shields, "have visited more than fifty towns in the middle west and in the east, have walked more than 100 miles and, though I always look carefully for birds, have not seen a single bluebird this season. The bluebird is, perhaps, the most modest and most inoffensive of all our native songsters, and so it has retired more generally before the onslaughts of the English sparrow than any other of our native birds, though all have been driven out to a greater or less extent.
"There are several important precedents for our proposed action against the sparrows. San Diego, Cal., started a war of extermination against them a year ago. It has been vigorously conducted, on about the same lines as we propose, and as a result most of the sparrows in that city have been killed and the others driven out. The California State university has cleaned its campus of them, and Meriden, Conn., has cleaned them out. The California state game and fish commission has inaugurated a state wide war against the intruders.
"If one city the size of San Diego can kill the sparrows and drive them out, every town and city in the land can do it, and we believe that at least 99 per cent of the people in this country will approve a war of extermination against this condemned nuisance, and that they will join heartily in it."
