RESOLUTIONS

Whereas, it has pleased Almighty God to remove from this life the immortal spirit of our beloved brother, James D. Glass, who died at his home in Reidsville, on the 12 day of March, 1917, therefore, be it resolved by the officers and members of Carolina Council No. 9, Jr. O. U. A. M. of Reidsville, N. C., in regular session assembled:

First: That, while we bow in humble submission to the decree of Him who doeth all things well, we do greatly deplore the removal from our fraternity of this brother, who, by his upright life and noble character, and by his loyalty to the tenets of our fraternity, had long since won and held a high place in the love and affections of our entire membership. He was a loyal Junior, a true patriot, an upright citizen, and a faithful servant of the Lord.

Second: That we extend to the bereaved widow and children of our brother, our deepest sympathy in their great sorrow, and assure them that we mourn with them in their loss.

Third: That a page in our Minute

Book be inscribed to the memory of our deceased brother, and that these resolutions be spread thereon; that a copy be mailed to the widow of the deceased, and that the same be published in The Reidsville Review.

Health Conditions Are Bad in Belgium

A study of the health conditions in Belgium since that people have endured the rigors of war and has suffered the privation of many of the necessities of life, has shown that poverty and a poor food supply are direct causes of disease and productive of a low state of health. This study made by Dr. W. P. Lucas of San Francisco and contained in the American Medical Journal relates the fact that the average person registering at the clinics is ten pounds under weight, while school children seemed to have stopped growing on account of underweight caused by undernutrition.

Dr. Lucas reports that newly born babies are not of normal size or strength, that the average weight of newly born babies is about two-thirds normal and they average one inch less in height. It is significant that the mothers are not able to nurse their babies as long as formerly, nor is their milk as rich.

But the darkest picture painted by Dr. Lucas relates to the increase of consumption in all parts of the kingdom. The reports of the consumption has about doubled in Brussels, while reports from the children's hospitals now that the disease is more than twice as prevalent in children as before the war. The report from the throat hospital is that tuberculosis of the throat has increased 150 per cent!

Dr. Tieron of Antwerp reports that in this city cases of consumption have become more frequent and more malignant; cures are much harder to obtain and old cases apparently cured for five years or longer are reappearing in large numbers. In Namur the consumption death rate has practically doubled.

Poverty and a poor food supply resulting in undernutrition are given as the fundamental reasons for the bad health conditions that now obtain in Belgium.

Londoners Long For Light.

It is noticeable that wherever an observer goes in London one subject comes uppermost sooner or later. That is the aspect of London when the lights are turned up once more. The universality of the longing for a lighted London again is remarkable. "The night that peace is declared," remarked an assistant in a barber's shop near the Strand, "I shall take my kids out in the street to look at the lights." "Don't you worry," retorted a skeptical customer. "By the time peace is declared, your kids will be able to take you out."—London Globe.
