There is no use in putting on an expensive roof when you can get a better roof and save real money by using

Certain-teed Roofing

CERTAIN-TEED is the best roof, not only because it costs less to manufacture, but also because it is weather-tight, light weight, clean, sanitary, fire-retardant, and costs practically nothing to maintain.

It is now used as the preferable type of roof for office buildings, factories, hotels, stores, warehouses, garages, farm buildings etc., where durability is demanded. CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply).

There are many roll roofings on the market, but only one CERTAIN-TEED. It pays to get the best. It costs no more to lay a CERTAIN-TEED roof than it does to lay a poor roof, but there is a vast difference in the wear. You can't tell the quality of a roofing by looks or feel. Your only safety is the label. Be sure that it is CERTAIN-TEED—then you are certain of quality and guaranteed satisfaction.

Certain-teed Slate-Surfaced Asphalt Shingles are supplanting wood and slate shingles for residences. They cost less, are just as good looking, wear better, won't fall off, buckle or split. They are fire-retardant, and do not have to be painted or stained.

Certain-teed Paints and Varnishes

are the best quality paint materials, ground and mixed with mechanical acguarantee of quality and satisfaction.

THE FINAL DRAFT TO LEAVE OCTOBER 17 FOR CAMP

The final 15 per cent of the drafted men will be called October 17.

The entire 687,000 men will be in cantonments and under intensive traning by November 1.

This information was made public at the war department today together with the fact that within the next two weeks President Wilson will issue a proclamation authorizing Provost Marshal General Crowder to proceed with the examination for military service of the 7,000,000 men to be called up in the present draft.

In addition it was stated that a new draft is under discussion although the conversations have not yet progressed to the point of considering a tentative date.

What will be done, from present indications, is the early transfer of approximately 100,000 men from the national army cantonments to national guard camps to recruit the militia to war strength. Then a similar number of men will be drafted to keep the national army camps full. Instead or another big draft-such as the present one of 687,000 men-is is likely that a series of drafts of numbers ranging from 50,000 up will be resorted to. These will keep the national army camps full as various units conclude their training in this country and sail for embarkation camps and the field in France.

The above draft plans are purely tentative, of course, but it has been definitely determined that the remianing 7,000,000 men shall be examined immediately. There are two reasons for this, one that the war department may know to the man how great a reserve it has to draw upon, and, the other, that business conditions may be disturbed as little as possible through uncertainty whether members of firms of valuable employers are subject to military service, and if so, when they are likely to be called out.

The urgent deficiency bill now in congress contains provision from \$4. 000,000 to \$6,000,000 to cover the expeses of the examination of the 7,000,-000 men. The house bill appropriated the smaller sum, but it assured that sufficient funds will be forthcoming to carry out the work. As soon as the conference report is adopted General Crowder will go to the white house to discuss with the President the new regulations necessary.

Meanwhile the provost' marshal's office is concentrating every energy to have the entire 687,000 called out under the present draft mobilized by November 1. Approximately 400,000 are now in the sixteen cantonments. More than 250,000 additional will begin to mobilize on Friday. By October 17 the full 85 per cent of the draftwith the exception of certain colored conscripts-will be in the camps and 103,050 men will begin.

October 17 was decided upon several days ago, but first word of its selection reached the public today. General Crowder has been informed by the governors of all the states that the complete quotas of each local board will be ready by that time. The governors also favored, by a majority of 46 to 2, the plan to proceed immediately with the examination of the remaining 7,000,000 -- Washington Special.

AN OPEN LETTER TO MR CHAS. A. PENN

Mr. C. A. Penn, Vice-Pres, American Tobacco Co.

Dear Sir:

As with all other good citizens of dial and benevolent wishes for the new war tax bill: abundant success and prosperity of the enterprises of the American Tobacco Company located in Reidsville. But we deeply regret to even think of dispesing of our Municipal Power Plant and franchise. The water plant and service is dependent upon the Electric Power Plant. Both are are efficient and satisfactory to ocr citizens at rates much less than our neighboring cities are charged. The service enters into our most intimate economic daily life-in the store. school, church, home and streets. We would lament and grieve to see the plants and franchise pass into the keeping of strangers.

We wish to ask if it would be satisfactory to your Company, if the city, through its Board of Commissioners, should pass such ordinances as will legalize for all time your right to purchase current for your manufacturing plant to supply all power and light you may need from the Southern Power Company?

We beg to submit that this plan would meet every requirement ever considered or contemplated in the location of your cigarette plant here. Please give us your earliest possi-

de answer nd oblige, Yours most respectfully, YOUR FELLOW CITIZENS Resources over Five Million Dollars.

TOBACCO CROP SHOWS

A BIG CASH INCREASE

The federal reserve bulletin for September, just made public, has the following reference to business conditions in the Richmond district:

At this particular season of the year, when the crops of this district have either matured and have been gathered, or are approaching maturhy, the estimated results are somewhat at variance with predictions Droughts, heavy rains, and light frosts in the past months, and perhaps more important, adverse labor conditions, share responsibility for discrepancies.

While some localities report corn thus curtailed 20 per cent, the district as a whole should exceed last year's crop by 10 per cent. Wheat and other grains are satisfactory. yet convinced that food control, see announced, will prove workable.

The potato crop is reported as of incressed rield with lower prices. Fruits, especally apples, are very satisfactory, both in yield and in prices. North and South Carolina should ield an average crop of cotton, with increased prices and increased net returns.

The tobacco crop will probably show cash results abormally increased. Notwithstanding the fact that earlier in the season the fertilizer sitthen the remaining 15 per cent, or uation inspired some pessimism, the yield has been 15 per cent. higher In other words America will have then last year and prices are not only

The lumber industry is more or less depressed, transportation difficulties and stagnation of building being contributive.

in many quarters far above the av-Bank deposits in many localities show increases, notwithstanding the fact that over \$80,000,000 have been paid problem as building a city would have for the first issue of Liberty Bonds. The increase is offset, in a smaller degree than was anticipated, by an increase of loans.

The issuance of the federal reserve notes for the period of a month, as compared with the crresponding period of last year show an increase of 60 per cent.

It would be unwise to minimize the grave importance of the scarcity of labor, and while some of our crops have been already harvested, we can hardly expect to escape loss through the inability of planters to gather the balance before adverse weather conditions prevail. Manufacturers may also expect difficulties until more labor is available.

LIFT YOUR CORNS OFF WITH FINGERS

Tells How to Loosen a Tender Corn or Callus so it Lifts Out

Without Pain

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati Many farmers are holding grain, not | authority to use a drug called freezone which the moment a few drops are applied to any corn or callus the sortness is relieved and soon the entire corn or callus, root and all, lifts off with the fingers.

Freezone dries the moment it is applied, and simply shrivels the corn or callus without inflaming or even irritating the surrounding tissue or skin. A small bottle of freezone will cost very little at any of the drug stores, but will positively rid one's feet of every hard or soft corn or hardened callus. If your druggist hasn't any freezone he can get it at any wholesale drug house for you.
