Where You Will Be at 65

Statistics show that out of 100 average healthy men at age of 25: 36 will be dead at 65. 1 will be rich. 4 will be wealthy. 5 will be supporting themselves by work. 54 will be dependent upon friends, relatives or charity.

CLIMBED STAIRS ON HER HANDS

Too Ill to Walk Upright. Operation Advised. Saved by Lydia E. Pinkham's Vegetable Compound.

This woman now raises chickens and does manual labor. Read her story: Richmond, Ind.—"For two years I was so sick and weak with troubles from my age that when going up stairs I had to go very slowly with my hands on the steps, then sit down at the top to rest. The doctor said he thought I should have an operation, and my friends thought I would not live to move into our new house. My daughter asked me to try Lydia E. Pinkham's Vegetable Compound as she had taken it with good results. I did so, my weakness disappeared, I gained in strength, moved into our new home, did all kinds of garden work, shoveled dirt, did building and cement work, and raised hundreds of chickens and ducks. I cannot say enough in praise of Lydia E. Pinkham's Vegetable Compound and if these facts are useful you may publish them for the benefit of other women."—Mrs. M. O. JOHNSTON, Route D, Box 190, Richmond, Ind.

REPORT KING'S WAREHOUSE AT LEAKSVILLE, N. C. This week ended December 15th has been one of the best weeks of the season. Some of the highest averages of the year have been made this week. Some of my customers who had been induced to try other markets came back to me this week and they all agree that King's Warehouse is the surest place to get the top dollar. Several farmers said that the best sales they had made were made this week. Our market will be open all next week including Saturday. Come right along any day you can get ready and you shall have top prices. J. B. TAYLOR

Smelting Art Ancient One.

In the old world the art of smelting ores was discovered about 1200 B. C. It has sometimes been suggested that iron tools and weapons may have been made at an earlier period from meteorites. Recently a considerable amount of evidence in behalf of this hypothesis has been presented by C. F. Zimmer. He has compiled a list of the known iron-containing meteorites, nearly all accumulated within the last century, and he shows from these alone about 250 tons of iron might be obtained. Of this amount more than 99 per cent is malleable, consisting of a nickel-iron alloy.
