

Two hundred and twenty-one boys and girls of Davidson county have enrolled for Four-H club work. Poultry, corn, calves, and pigs are the major projects for the boys while the girls are studying nutrition and clothing for health.

Farmers in Matrin County received an average of 21 cents a pound for their poultry shipments last week. Shipments totaled 100,241 pound for which they received \$2,116.50 in cash.

CORNSTALKS

Just as the invasion of the European cornborer has put up to every farmer in the corn growing regions the problem of how to get rid of his corn stalks and hold the pest-in check, new inventions for the utilization of this farm waste for making paper and also a substitute for lumber have been perfected.

Now capital in large amounts has been subscribed to finance industries which will contract with farmers for their stalks after harvest, send their own machines into the fields to gather them, haul them to central points where they will be manufactured into useful products. This will help conserve the forests and will also add to the profits of the farmer.

GAS

The International Red Cross is preparing for the next war. One of the certainties about the next war on any large scale is that poison gas will be used on a larger scale than ever before. War is no longer an affair of king and hired armies; it is whole nations against whole nations. The aggressor in the next great war will not wait for the enemy to assemble an army, but will try to wipe out a whole city by dropping poison gas from the clouds.

What the Red Cross is looking for is some means of detecting the most minute trace of poison gas in the air. A prize of \$2,000 is offered to the successful inventor. And we call this a civilized world!

EMOTIONS

Anger, fear, worry especially the latter kill more people than "real" diseases, according to a report recently made to the New York Academy of Medicine. There is no such thing as overwork, either of body or mind. The body given sufficient nourishment, will quit of its own accord when fatigue becomes too great, and a nights sleep will put it back into trim again. Probably no human being has ever used his brain to its capacity. Men who have studied that subject say that most of us use less than a quarter of our power of thought.

But let worry, jealousy, fear of losing one's job, one's money or one's sweetheart, creep in, and the whole picture is changed. The emotional tension tires both mind and body, which cannot go on without violent stimulation, and the process of decay is hastened. Most of the deaths from heart disease and kidney trouble are the result of emotional tension rather than any real defect in the physical organs.

LIFE

With all the talk about the increased average length of human life, the age of seventy still remains the normal limit for human being. So Dr. Louis Dublin, medical head of one of the great insurance companies reports. Only exceptional individuals live beyond 70, and in America the proportion who die between 65 and 70 is increasing. Yet the average American lives longer than his father's generation did, much longer than in his grandfathers time. That is because the illnesses which used to kill off babies, children and young people of both sexes are not so prevalent as formerly.

Every American baby born today has a reasonable chance of living to 55, which is the average length of life in this country, as against 48 in most of Europe. But the man who reaches 55 cannot count on more than fifteen years of life with any degree of certainty, and the chan-

State Farm News

MORE LIVESTOCK NEEDED ON FARMS

A growing demand for more milk, butter, beef and poultry makes it absolutely necessary that farmers in North Carolina increase their livestock production if they continue to "live at home."

"The rapidly increasing urban population has brought to the farm door the opportunity of buying those things that at one time were of necessity produced on the farm," says A. C. Kimrey, dairy extension specialist at State College, "but it is also increasing the demand for all kinds of livestock products. In neglecting to increase his dairy herd and poultry flocks the farmer is neglecting a wonderful opportunity to not only produce a good living but also make a good income from the farm."

In the early days of our history, states Mr. Kimrey, when the markets were few and far apart it was not only good business but a necessity to produce everything needed on the farm. This naturally led to the production of crops that were adapted to slow marketing such as cotton tobacco and grain. But now, he states, it is not only necessary to produce the things needed on the farm but also to produce those things most in demand at the nearest market which in most cases is at the front door. The constant demand today for food products from livestock.

According to Mr. Kimrey, livestock, pasture and feed crops in reasonable proportions will enable every farmer in North Carolina to utilize a maximum percent of his acreage and will at the same time produce a decent living and a marketable surplus of livestock products.

"This is the only permanent solution and as long as the farmers of North Carolina refuse to follow this system just so long will they have a small and insufficient farm income and a standard of living not in keeping

brought to White Rock 22. Funeral conducted by Rev. N. L. Fulk. Interment was in the White Rock cemetery.

One ton of lime used under lespedeza by J. L. Cauble of Albemarle in Stanley county increased the yield of green hay 5,280 pounds to the acre. The yield on the land without lime was 3,520 pounds as compared with 8,800 pounds where lime was used.

If we ever do go to war against Great Britain it will be over something more important than a coal bed located where it is always below freezing and usually 40 degrees or so below zero. Even if coal were accessible it would not be worth fighting over. Coal is losing its importance in the economic scheme of things now that oil has become the principal fuel for the world's navies as well as the merchant marine.

Seed-Corn Queen

Ruth Thomas is only thirteen, but she won over scores of men and boys in the "best seed-corn" contest recently held at Sedalia, Missouri. Corn of her personal selection and planting being adjudged the best shown.

OBITUARY

Mr. Edward Loyd of Thurmond, N. C., was born May 5th 1897. He joined the church at the age of 15 or 16, was married to Miss Pearl Thompson Sept. 4th, 1927. To this union was born one child, Dorothy, near two years old. Brother Loyd departed this life January 21st at the age of 32 years 8 months and 16 days, leaving his father and mother, Mr. and Mrs. W. E. Loyd, three brothers Frank, W. H., and Earnest, one sister Rosey Crigger of Va., his good wife and little Dorothy and a host of friends to mourn his loss. He had been in failing health for 2 years or more, but was taken seriously ill and passed away in three or four days. He left evidence that he would be better off in the next world. He died in the hospital at Mt. Airy, N. C. January 21, was

"Commoner's" Widow

Mrs. Mary Baird Bryan, widow of the late William Jennings Bryan, passed away at the home of her daughter, Mrs. Grace Hargreaves, in Hollywood, Cal. Mrs. Bryan was almost as widely known as her famous husband, in whose work she took an active part for many years.

Mrs. H. B. Davenport, of West Main Street, who has been sick for the past several weeks is improving.

NOTICE

Wilkes Hatchery, N. Wilksboro, N. C.

their LIVES are in YOUR HANDS!

DOWNY LITTLE THINGS... not long out of their shells... how much they must depend on you for the things they need to live and get big. They need a feed filled with nourishment. A feed which will build bones quickly... building muscles strong... change fuzz to feathers in a hurry... all this they demand... and yet their little crops can handle only one tiny thimbleful of feed a day! What a job for feed!

Consider Purina Chick Startena (mash) for this job! In every thimbleful are twelve ingredients! Cod-liver oil... dried buttermilk... alfalfa flour... granulated meat... these and eight others are there... each one with a real job to do. Purina Startena is mixed over and over again... 960 times just to be thorough! And you will find the same care taken with Baby Chick Chow (scratch)... to be fed with Startena.

Your chicks... what they do for themselves... what they do for you... is entirely in your hands. They eat so little... yet it counts so much... that you can afford to do only one thing... feed Purina Chick Startena!
