

The light of truth -Based on FACT-

When you turn on the light in a dark dingy basement it usually causes a scampering to cover of the occupants who do their "best" work in the dark. Likewise when a calamity howler's rumor comes under the light of thorough and complete investigation both the rumor and its instigator run for cover.

We are at the threshold of a new decade in which the predominant note is one of continued prosperity; everything points in unmistakable signs to one of the greatest years in our history, from the standpoint of National, State and Individual well being. We can guarantee that prosperity if we individually "spike" every story that is not based on fact. Let's confine our remarks to the things we KNOW TO BE BASED ON FACT.

Lets go
