## COMMITTEE GIVES APPROVAL TO BILL

Hancock Aids Materially In Pushing Measure Through Congress

Unanimous approval has been given the Flannagan tobacco grading bill by the Senate agriculture committee, and passage by the senate is expected soon.

President Roosevelt has given his blessings to the measure and the support of Senator Josiah Bailey has also been won.

Considerable credit for the advancement of the measure should go to Congressman Frank Hancock, of this district, who has worked untiringly for its passage since it was introduced in the House. Mr. Hancock understands the workings of the tobacco growing industry and is well acquainted with the method of marketing, and it is through his efforts that the bill has been speeded on its way through Congress.

The bill is designed to protect the tobacco growers in the marketing of their tobacco and should prove a great help to both farmer and tobacco warehousemen alike.

## LATE NEWS from the State and Nation

### WOULD ABANDON COTTON EXPORTS

Stoneville, Miss., Aug. 13.—The United States will abandon all its cotton exports rather than let our farmers go into open competition with Brazilian peons or Sudanese sheiks, Chester C. Davis, AAA administrator, said today.

It was the new deal's answer to the cotton trade—the merchants, brokers and shippers, who charge that the government's 12-cents-a-pound loans to farmers have pegged the price of American cotton so far above the world market price that foreigners are refusing to buy from us.

"I would give up the last bale of our exports and see every exporter padlock his doors before I would sell out the farmer," Davis said.

### FEAR 200 DROWNED

Rome, Aug. 13.—The hundred persons were feared drowned today when flood waters from a dam burst inundated Ovada and neighboring towns.

Officials estimated 130 dead from flood and storm in the Ovada district alone. Casualties in areas not inundated were reported slowly because of disrupted communications.

Officials at Turin ordered relief workers to assist authorities at Ovada, located in the piedmont region, 20 miles south of Alessandria on the Orbe.

### TEXTBOOK COMMISSION IS PESSIMISTIC

Raleigh, Aug. 13.—The state textbook rental and purchase commission tonight completed a four-hour session without gaining any ground toward establishing a school book rental system for North Carolina.

"We are very much discouraged but we are continuing negotiations," said Clyde A. Erwin, state superintendent of public instruction and chairman of the group.

### VOTE TO CONTINUE BOTTLE SALE

Washington, Aug. 13.—Ignoring a charge of Majority Leader Joe T. Robinson that a distillers-bottlers combination has given the country "the most beautiful bottles in history and the worst liquor," the Senate voted 59 to 24 today to continue the present bottle sale.

The vote came just before passage of the administration's bill restoring federal control of the liquor industry, which went out the window with the NEA codes. The bill now goes to conference with the House, which voted to permit bulk sales.

Mrs. M. B. Cottrell and Mr. and Mrs. Fred Williams, of Oak Ridge and Mr. and Mrs. Allen McNeil, of Greensboro, were the Sunday guests of Mr. and Mrs. Carl Young and Mrs. W. E. Bohannon.

## PARALYSIS IS ON DECREASE IN STATE

Steady Decline In Number of New Cases Is Noted

Raleigh, Aug. 13.—First definite break in North Carolina's infantile paralysis epidemic came today when not a single new case was reported in the state. It was the first day since May 20 that no new cases have been reported to the state health department.

The last week has seen a steady decline in the number of new cases in the state. Four cases were reported yesterday, two Saturday, two Friday, and three Thursday, in contrast to the previous weeks, when the number of cases daily ran as high as 20 or more.

The total number of cases reported to the health department since January 1 stands today at 534. Of these 56 are still infectious, according to health department records.

Dr. J. C. Knox, state epidemiologist, cautioned, however, that danger of paralysis was not over in the state.

"The fact that no cases were reported today does not indicate there won't be any more," he said. "Very probably several new cases will be reported within the next day or two. The disease will bob up and down periodically now until about October. Parents should not throw precautions to the winds in guarding their children against infection. They still should be careful to keep them away from crowds."

Dr. Knox added, however, that the recent reports did indicate a definite decline in spread of the disease.
