8-room new brick bungalow just out of the incorporate limits.

For Rent—6-room bungalow in West Elkin.

D. C. MARTIN and W. S. REICH Phone 17

President Roosevelt in West

WASHINGTON . . . Heading West with the intent of returning by the Panama Canal, President Roosevelt is on his swing across the country to San Diego, Calif., via St. Louis, Omaha, Cheyenne, Boulder Dam, Salt Lake City and Los Angeles. After viewing the Pacific Exposition at San Diego and delivering the second of his scheduled speeches, The President will board the cruiser Houston for a fishing expedition to Panama Canal, across which he will pass Northward. It is expected that he will land at some southern U. S. port on the Eastern seaboard.

by the same ideal, that of remaking the social and economic order so that life will be easier, or at least more bearable, for everybody. I am certain, however, that not all of the methods by which nations are striving to reach that goal can be right. Leaving personal and party ambitions, jealousies and hatreds out of the question, some of the plans must be wrong. My feeling is that every plan to make the world over will fail unless and until it is approached as a spiritual problem. Politics cannot instill the spirit of fair play and tolerance; still less can war make for brotherly love. But social justice and economic security will be idle words, signifying nothing, until those spiritual ideals rule the world.

MONEY changes

Money and customs concerning money are constantly changing. I don't know how many local names there are for the sum represented by 12½ cents. In my boyhood it, used to be called a "York Shilling," and not many years ago I still heard rural residents of New York calculating in terms of shillings—eight to the dollar. Our "New England Shilling," on the other hand, was a sixth of a dollar—16 2-3 cents. In the South, as far north as Virginia, I used to hear 12½ cents called a "Levy." I do not know whether the term is still in use or not. But I hear western friends refer to a quarter as "two bits."

I can remember when no actual coin smaller than a five-cent piece circulated on the Pacific Coast or in the Deep South. Newspapers all sold for a nickel, and all the store prices were in multiples of five cents. A San Francisco merchant nearly caused a riot by bringing in a few tons of pennies and marking goods in odd-cent prices.

COINS proposed

The Treasury is proposing to issue new kinds of money. Half-cent pieces, of copper, and one mill—a tenth of a cent—coins of aluminum, may soon come into use. The need for these coins arises from the sales taxes in many states.

The suggestion of the new coins takes me back to boyhood, when many coins were common which have long since vanished. The big copper half-cents were often seen, but commoner was the two-cent piece, made of bronze and somewhat larger than the one-cent piece. Then we had two kinds of three-cent pieces, one of nickel, about the size of a dime, and one very much smaller, made of silver. Silver five-cent pieces were in common use in the 1870's. We also used to see twenty-cent silver coins, about the size of a nickel.

It seems to me that the one new coin that is most needed is a 2½ cent piece. It would find a variety of uses, especially in buying items now sold "two for a quarter."

FORESTRY up our way

Early the other morning I heard the sound of woodmen's axes, followed by the crashing of a falling tree. In the clear mountain air the sounds carried for a long distance. What I heard was an echo, reflected from the steep side of Stockbridge Mountain. The choppers were at work two miles away, in one of Noble Turner's pine lots, on the slope of Tom Ball Mountain.

Next morning I heard the strident song of a buzz-saw. Will Seeley had set up his portable sawmill and was slicing the pines into boards almost as fast as the axemen could cut them down. Noble Turner tells me that the most profitable of all crops is trees. He owns several thousand acres of mountain pines, and gets a comfortable income with little labor. I don't own any pine land. I wish I did!

MULES war steeds

The preparations for war in East

Africa have sent up the price of American mules! Even in these days of mechanized transport, you can't get men, guns and supplies across African deserts and mountains without the aid of the mule. So Mussolini, I learn from a friend who has been busy buying up Missouri's most famous livestock product, is collecting mules from all over the world. I remember in the last important African war, between the British and the Boers, another friend who made a comfortable fortune by sending several shiploads of Missouri mules to South Africa and selling them to the British army. War anywhere in the world affects all the rest of the world.

What father would like most to get out of his new car is the rest of the family.

DOWNYFLAKE DOUGHNUTS

Tom Shugart's **NU-WAY CAFE**

Men's Suits
Men's new fall suits in the latest styles and colors at very attractive prices—

POOR EYESIGHT AT 21?

Help Your Child to Avoid Eyestrain

Science tells us that one school child out of every five has defective vision! And that even children with good eyes are often the victims of eyestrain. To protect children's precious sight there are two important things every parent should do:

1. Have their eyes examined regularly by a competent eyesight specialist.
2. Provide adequate lighting—without glare and shadows, for reading, writing and studying.

The new I.E.S. Better Sight lamps are designed exclusively to help save eyes! They are exactly the right height to spread adequate light where it is needed. A special opal glass bowl hides the bulb, diffuses the light, prevents glare. The shade has a white lining that reflects the maximum amount of light—and is open at the top to aid in general illumination. There are many attractive floor and table models, at moderate prices.

RECIPE FOR BETTER SIGHT—
Be quite sure that Eyes are right
Have lots of Light . . . no bulbs in sight
Keep all walls and ceilings Light
Add them up for Better Sight
