## TOBACCO GROWERS, TRUCK GARDENERS!

We introduce the Greatest Planter of all time  
**MASTERS' NEW IMPROVED 1937 PLANT SETTER**

Plants, Covers and Waters With One Operation

Masters built the first practical automatic plant setter over forty years ago. Since then it has been continually improved. Our new 1937 model is the last word—it has no competition. Others may imitate but never equal Masters' efficiency and durability. Tobacco buyers say they can tell when a crop has been Masters' planted by its uniform high quality. They gladly pay highest prices for this finer yield. Masters' Improved Plant Setter is guaranteed to give perfect satisfaction in planting.

**Tobacco, Tomatoes, Cabbage, Sweet Potatoes and other plants**

Nearly all first-class hardware and implement dealers handle, recommend and sell Masters' Improved Plant Setters. Ask your local merchant to show you this newest and best device of its kind. If your dealer doesn't have it in stock, write for full information direct. Don't wait until planting time. ACT NOW.

## 1-MINUTE SAFETY TALKS

By Don Herold

### SO I'M A HYPOCHONDRIAC?

One of my friends (in fact, it was my older daughter) has accused me of being a "hypochondriac" on this subject of automobile accidents.

All right, then, the railroad companies are hypochondriacs on the subject of safety.

That's what makes them safe.

When your train stops in a station, you see and hear men tapping the wheels and brakes, looking for possible trouble.

Railroad hypochondriacs, I guess. Afraid of accidents—the sissies!

All along the railroad tracks are red and green lights, to keep trains from bustin' into each other. If the engineer sees a red light, he's just enough of a hypochondriac to stop his train.

Constant inspection and constant care are the price the railroads pay for their enviable safety records. They know that they can't depend on luck

or bravery. The railroads are not afraid to be cowardly careful.

We motorists can't depend on double tracks or red light signals to keep us from smashing into each other, but we can heed the red lights of last year's accident records and of today's papers' reports of yesterday's crashes.

We can face 1935 figures gathered by The Travelers Insurance Company, for instance: automobile accident deaths, 36,100; persons injured, 895,280; accidents caused by drivers exceeding speed limit, 121,460; wrong side of road, 85,770; cars with defective brakes in accidents, 18,690; with glaring or "out" headlights, 10,750; punctures or blowouts, 7,360.

And we can have our brakes and steering apparatus and lights inspected freely and we can throw our old tires away, and we can drive with brains instead of bravado—even if we are accused of being a little hypochondriac on the subject of safety.
