

MAKING OF BASKETS IS LARGE INDUSTRY IN YADKIN COUNTY

This Section Controls Output
of Tobacco Baskets
of The World

\$150,000 ANNUALLY CASH

The tobacco basket one sees shoved around tobacco warehouses doesn't seem so much but to Yadkin county the manufacture of these baskets is second only to the tobacco crop itself.

Yadkinville has almost a complete monopoly on the making of these baskets, there being the only factories of the kind in the world located here except a small one in Kentucky and to the laborers and landowners of this section it means around \$150,000 annually and almost a penny this money goes right into the pockets of those who need it most — the working man and small landowner who sells a little timber to pay his taxes, buy school books, etc. The only item in the manufacture of the baskets that goes outside the local area is \$2,000 annually for 500 barrels of nails.

Local truck haulers reap a rich harvest from the distribution of the baskets into nine surrounding states. Only one car load of baskets have been shipped by freight in recent years, this one going to Missouri last year. The remainder goes into Florida, Georgia, South Carolina, Tennessee, Kentucky, Virginia, Ohio and many points in these states. They carry 500 baskets to each truck.

200,000 Yearly
In an average year the three factories located in Yadkin ship around 200,000 baskets annually,

A Familiar Sight On Yadkin Highways

One of the familiar sights on the highways leading out of Yadkinville is the trucks loaded high with 500 tobacco baskets, the making of which is quite an industry in Yadkin county. which are produced during the season of about seven months and brings in \$150,000. The process of making these baskets has been developed from a small beginning with little machinery to its present output with machinery built for that business only.

The first baskets were made by the late Ike Baily of Courtney, near Yadkinville, and his factory, now owned by his sons, Newman, Lawrence and Lindsay Baily, is the largest of its kind in the world. The other two plants are owned by D. A. Reynolds, W. H. Gregory, B. H. Dinkins, H. H.

McKnight and a small part by High Point interests.

The three of them work 100 hands eight hours a day at an average of \$15.00 weekly. The landowners of Yadkin and northern Davie counties get their share from selling "splints" and "rims" for making the basket, most of them making good wages and getting a fair price for their timber.

This industry has grown up so slowly in this section that we scarcely realize the benefits of its scope unless we take time out to put together in figures the amount coming into this section annually and its distribution among the citizens.
