Some people don't appreciate how really cheap my services are. Here are some figures that will open your eyes:

The expenditures for admission to moving picture theaters during 1935 was \$750,000,000 — about \$50,000 more than all the residential and farm customers in the United States paid for all the electricity they used that year.

Federal taxes alone on liquor and tobacco are 1½ times the total paid by 21 million American homes for electric service.

Again—the total cost of electricity to all the families in the United States is less than American automobile owners pay in taxes on gasoline—not for the gas itself, but just for the privilege of buying it.

Study those figures a little and you will appreciate more than ever how cheaply I work for you.

Your Servant,  
Reddy Kilowatt
