

FARMERS APPLY FOR PEA SEED

Assigned to the Surry County Agricultural Conservation Association

SHOULD PLANT SOON

Of the 8,000 pounds of Austrian Winter Pea seed consigned to the Surry County Agricultural Conservation Association 3300 pounds have been applied for by farmers.

Austrian winter peas should be planted between September 1 and October 15, preferably as soon in September as possible. Forty pounds of seed per acre is recommended where this variety of seed peas have not grown before. Inoculation is necessary and will be available at cost when the seed are received.

Each acre seeded to Austrian winter peas will count one unit toward meeting the soil-building goal for 1940. One unit will be given for each acre of winter peas turned next spring on the 1941 program if this particular practice remains for 1941 as it is for 1940.

The winter peas are ordered as a grant-of-aid and for each pound ordered 5c is taken from the 1940 agricultural Conservation Program payment. Farmers wishing to get these seed peas are urged to put in their order at once. Orders are coming in rapidly and the first orders received will be the first orders filled.

PLANS READY FOR MEETING

Midwestern Press Association to Hold Session in Ashe County

TO ATTEND FESTIVAL

West Jefferson, Aug. 13.—Plans are now being completed for the August meeting of the Midwestern Press Association which will be held in Ashe county, widely known as the "air-conditioned section of the south," on Friday night, August 16.

A record attendance is expected and advance registrations indicate that a number of the members and their wives plan to remain over for the week-end in order to make a tour of the famous Blue Ridge Parkway, attend the White Top National Folk Music Festival, and to enjoy the high altitude, cool climate and majestic mountain scenery which Ashe county offers.

Ed M. Anderson, publisher of The Skyland Post and The Alleghany News, and president of the association, who is in charge of arrangements, said that not only would an interesting program be carried out on Friday night, but that proposed plans for the week-end would insure a pleasant and profitable time for all who could arrange to stay over.

IMPROVEMENT

Increased industrial production for national defense is expected to create a sound improvement in domestic demand for farm products, reports the U. S. Bureau of Agricultural Economics.

HYBRIDS

New, high-producing hybrid chickens, bred by methods now commonly practiced in the growing of corn hybrids, have been announced by a corn company of Des Moines, Iowa.
