BATAAN DEFENDERS ARE PUSHED BACK

LATE NEWS IN BRIEF

From the State and Nation

NATIONAL

WASHINGTON, April 7.—The manufacture of most consumers' durable goods will be halted for the duration of the war by May 31, Chairman Donald M. Nelson of the war production board reported today in announcing two imminent new orders—a civilian construction stop-order and a ban on the use of steel in hundreds of civilian articles. These two actions, added to the swift succession of production curtailments and stoppages which will be almost complete by May 31, are of equal importance to "the winning of a major battle," Nelson told a press conference. The building order will suspend non-defense construction and stop the use in building materials of war-essential metals, Nelson said. The steel order will not only prohibit the use of iron and steel in a multitude of common items, but also will ban the use of other metals and scarce plastics as substitutes.

WASHINGTON, April 7.—A daring American submarine, striking directly at Japanese shipping in the hazardous waters of the China sea, has sunk two merchant vessels totaling 15,000 tons, the navy announced tonight. It was the third navy communiqué in four days dealing with the success of the far-ranging American undersea raiders against the extended Japanese supply lines. The three announcements listed 12 Japanese vessels, including two light cruiser, as sunk or damaged. Altogether, American submarines have destroyed or damaged 53 Japanese ships in the Pacific theater.

INTERNATIONAL

NEW DELHI, India, April 7.—A continuing Japanese push northward up the broad, sea-level valley of the Irrawaddy river in Burma was reported today by the British, who announced the defending forces had fallen back more than 40 miles north from Prome after destroying oil and cement installations at Thayetmyo and Alanno. The Japanese columns last were reported at Kama, on the west bank of the Irrawaddy 15 miles above Prome, and at Nyaubingzeik on the east bank, a British communique said. Other Japanese elements are moving northeast up the Sinoval valley, farther east on the path to Mandalay, still more than 200 miles distant.

NEW DELHI, April 7.—Despite a British offer to appoint an Indian defense minister, the congress party tonight was understood to have rejected Britain's amended plan to give India self-government after the war. But the door was kept open for further negotiations as the impression gained headway that efforts being exerted by President Roosevelt's envoy in New Delhi, Col. Louis Johnson, may yet result in a compromise acceptable to all sides. At the same time, the congress party's most potent leader, Pandit Jawaharlal Nehru called on India's millions tonight to organize themselves for resistance to the Japanese aggressor who has brought the war to their shores.

KUBYSHEV, U. S. S. R., April 7.—Soviet airmen and ground batteries destroyed 79 German planes yesterday to boost their nine-day total to 494 Nazi craft against 103 Russian losses for this period, the Russians announced officially tonight. The latest figures given in tonight's Moscow communique indicated a slackening in the furious pace of the aerial warfare which reached a peak over the week-end.
