PICTURE OF A MAN TALKING TO HIMSELF

Well, Browning, you know you've got it to do, so there's mon's studio and worry him? Aftno use fooling around any longer. It doesn't make any dif- er all, he has to work for a living, ference if folks don't read it, it's part of your job. So take and hasn't time to listen to silly your feet off the desk and get busy.

Sure, you had business down town a while ago. It was very important you go to the drug store and lean on the soda fountain. That's a habit, and also a very convenient theatre. You're planning to see way of killing time. And we'll grant that perhaps you should the show tonight anyway, so why have stopped on the corner by the bank and watched Will Snow playing in the slush and water with a small shovel. Anyone could see the melting snow had banked up there and hasn't found out in all these years, caused a puddle. And maybe it was to your interest to stop eh? Maybe not, but the time

How Well Has General Electric Met These Objectives?

HIGHER. WAGES

Here's how General Electric's increased production and efficiency have affected G-E workers. Average hourly earnings for men, not including overtime pay, have gone up as follows:

1937	.81
1938	.87
1939	.86
1940	.85
1941	.89
1942	.96
1943	1.05
1944	1.09
1945 (Sept.)	1.09

Overtime pay gave G-E workers more on top of this. G.E. has made jobs for nearly three times as many. 61,781 worked for G.E. nine years ago.

In 1945 an average of 145,-000 had jobs at G.E. and at much higher pay.

LOWER PRICES

G.E. has an obligation to a second group of people-the public. The public wants improved products at fair prices. "More goods for more people at less cost"-G.E.'s goal -is not a part-time assignment. It is a job for management and worker alike if G.E. is to keep growing, keep raising wages, keep making more jobs for more workers.

A few figures show typical price decreases:

FAIR **PROFITS**

G. E. during the war earned 4.7¢ on each dollar of sales. Of this, 4.1¢ was paid to its more than 200,000 stockholders and the remaining sixtenths of a cent on each dollar was retained in the business to assist in carrying on and expanding its operations.

All money earned over this 4.7¢ was turned back to the U.S. Government. G-E costsaving methods had made war goods for less money than

the Government expected. These dividends have been declared per share of common

GENERAL ELECTRIC'S OBJECTIVE has been to keep prices moving downward, keep wages going up, and to earn a fair profit. This calls for volume production, more efficient work and methods. With the help of every single employee, General Electric believes it can show our country; as it did in wartime, an example of American enterprise at its best:
