Hydroelectric Power Addition Recommended

Another Yadkin Flood Control Survey Asked

A re-survey of the Yadkin River so that provisions for hydroelectric power may be added to proposed flood control projects was recommended at Raleigh last week.

The recommendation was made by the Governor's Advisory Committee on the Comprehensive Development of Flood Control and Hydroelectric Projects.

The committee said in a statement: "We favor a restudy of the flood control problem on the Upper Yadkin in the light of present economic conditions, provided that the present program is deauthorized by Congress, so that all aspects of the flood control problem of that area and the possibility of using any dam or dams considered essential for flood control

GRAND JURY IS WELL PLEASED

Surry Installations Are Inspected and Found To Be In Good Condition

SUGGESTS SMALL REPAIR

Surry County installations were found to be in generally good condition last week, according to a report by the grand jury.

In the report to Judge J. H. Clement, presiding at the current term of Surry Superior Court, the foreman, S. A. Hennis, Jr., made the following statements: "We, the Grand Jury of the September term, 1949, of the Surry Superior Court herewith tender our report of the transaction of our body, to wit:

"We have heard testimonies of 30 indictments, and have returned 30 true bills. One indictment was called by the Court through the defendant pleading guilty. We are returning two indictments for lack of witnesses.

"1. With reference to the prison camp, we found the same in A-1 shape. With reference to the supervisors and attendants of the camp and their duties, we would like to commend them very highly.

"2. We inspected the County Home and found it in general in good condition.

"3. We inspected the Court House and found same to be in good condition.

"4. We inspected the County Jail and make the following recommendations: (a) Shower floors need repairing. (b) Screens need repairing.

"With reference to the general condition of the jail and to the duties of the attendant, same is in very good order. We feel that the small recommendations on the County Jail should have prompt action.

"Respectfully submitted, this 20th day of Sept., 1949.
S. A. Hennis, Jr., foreman."

Politics Behind Yadkin Dam Fight Say Authorities

Difference of opinion among engineers is the reason given by authorities at Raleigh for delay in the Yadkin River flood control and power program.

Some engineers think several small dams are required, others insist one big dam will do the job more economically. Back of this technical reason, however, is a lot of political maneuvering.

Congressman Robert L. Doughton and Congressman C. B. Deane do not see eye to eye on the project. Doughton favors emphasizing flood control with only secondary, if any, consideration for power development. Deane favors utilization of proposed dams for both purposes.

But there is more than that involved. The big dams proposed would inundate a lot of fertile land in Caldwell County, which is in Doughton's district, while almost sole benefits from flood control would accrue to Wilkes, Yadkin and Davie Counties, which are in Deane's district. Each Congressman is properly looking after the interests of his own constituents.

Trial Set Yesterday For Doctor Charged With Criminal Abortion

OTHER CASES LISTED

The trial of Dr. B. O. Choate of Sparta, charged with performing a criminal abortion, set for trial yesterday (Wednesday) in Surry Superior Court, has been continued by Judge J. B. Clement on motion of attorneys for the defendant.

A statement from doctors at St. Albans Sanatorium, Radford, Va., presented to the court, declared that Dr. Choate had been a patient at the hospital on different occasions since his trial in Surry Superior Court two years ago.

The statement concluded with the assertion by the doctor at the hospital, "in my opinion, Dr. Choate is still in serious condition and in my opinion, a trial in the Superior Court on the charges now pending against him in Surry County might seriously affect any chances that he may have for a recovery and might cause a complete breakdown during the progress of the trial."

Dr. Choate was convicted by a Surry County jury and given a prison term on one to three years. An appeal to the Supreme Court gained him a new trial.

Other cases completed in court last week and through Tuesday this week were as follows:

Mickey Fulk, disposing of mortgaged property, capias instantier issued.

Walter Phillips, Jr., speeding, alias capias issued.

Robert Shelton, o. c. i., and driving after revocation, alias capias issued.

ARARAT MAN IS AHEAD IN RACE

H. L. Badgett Takes Lead In State-Wide Wheat Growing Contest

47.8 BUSHELS PER ACRE

H. L. Badgett of Ararat is well out in the lead in the North Carolina State-wide wheat growing contest, according to information from the North Carolina Crop Improvement Association.

Mr. Badgett got a yield of 396.6 bushels of wheat from 7.4 acres of land, which figures 47.8 bushels per acre. His nearest competitor, whose address was not given, got a yield of 43 bushels per acre.

The State average is much less than half of Mr. Badgett's yield.

To produce his yield, Mr. Badgett obtained three bushels of Atlas 66 seed wheat from the Crop Improvement Association and an additional five bushels from the FCX in Statesville, seeding the five bushels under contract for the FCX. These eight bushels were sufficient to seed the 7.4 acres.

On 15 acres of similar land in 1948, Mr. Badgett made 373 bushels of Red Heart wheat. He regards the new Atlas strain of wheat as one of the finest contributions to agriculture in small grain in the history of the Crop Improvement Association.

Mr. Badgett cultivates approximately 70 of his 87-acre farm.
