The Recorder says: "The existence of this saurian reptile in Glover's pond has been known for twenty-seven years, and many is the load of buckshot that has been dred at him, but it was reserved for the good marksmanship and long range rifle of Capt George to terminate his depredations. The reptile must have been not less than 50 and not improbably 75 or 100 years old.

The Aiken Recorder says: Rev G W Manly, former pastor of the Aiken Baptist church, has written a letter ' Intendant W Quitman Davis, of Atken dated Laipaic, tiermany, July 23d, asking for papers to establish his identity, so that he can prove to the police that he is not a dynamite conspirator. ## Barbarism in Eastern Europe.

The riots at Eksterinoslav, caused by animosity of the Russian peasantry against the Jews, continue, to the great diagrace of the authorities charged with the maintainance of law and order. On the third of the present month a mob attacked the Jewish quarter and destroyed dwellings and liquor stores, occasioning the killing or wounding of as many as a hundred persons. Such incidents might be interpreted as ev. dences of the weakness of the Russian administration were it not that they were almost paralleded recently in Hungary under the exceptionally well-organized and efficient government of the Austrian Emperor. The proper significance of these persecutions is that the populations of eastern Europe are unprogressive, or, if progressive, have as yet advanced but little beyond the barbarous fanaticism of the middle ages.

Chicken Cholera. The disease known as cholera attacks oung and old chickens. It carries off the weakly chicks and those that are chicks is fine cornmeal and wheat middlings in equal quantities made into a thick dry paste with boiling water and fed cold. To prevent cholera in older fowls, they should be kept clean and provided with clean food and water. A variety of food should be given and not wholly corn. To cure the disease. give one teaspoonful of saturated solu-tion of hyposulphite of soda three times a day; give no food, but plenty of water, and keep in a coop on some fresh, clean, dry, loose soil, to keep clean. A week's treatment will be sufficient, and if it is taken in time two days will do it.

The Noble Apache. An Apache Indian complained to the agent that the people called him a bad Indian. He said: "They say I killed my mother. Yes, I did, but I did it because she was too old to work. Then they say I killed my wife. I did that

because she was too sick to work. They talk about me killing my papoose. Well, I did that, too, but it cried too much and I couldn't sleep. I'm 'good Indian,' not 'bad Indian."

A Henry-Weight Immigrant. Patheleiphia Bected.

Among the immigrants on the steam ship Westphalis, which arrived at New York on Sunday, was Carl Theilier, a German shoemaker, whose avordupois was over 600 pounds. Theilier will embark in the hole business on Base street.

### THE LAST STATEMENT.

The Western Union is Not Doing as Much Business but Isn't Losing Any NEW YORK, August 9-The Western

telegraph company reported this morn-ing that there had been no wire cutting last night, and that business was all cleared up. This am when the day force took their desks, one lady operater who had been out with the strikers returned to work, that there was no truth in the statement that the company was losing \$50,000 a day is consequence of the strike. The company was not losing anything at all, and it was probable that the net receipts were lit-tic if any below the average. There was, of course, a falling off of the gross receipts, and this, upon good authority, was stated to be less than fifteen per cent, on the other hand the company's expenses have been deminishing as many small offices were not open. The force was smaller in our large offices. While the company was not making as much perhaps as before the strike, it was not losing anything. In regard to the amount of business now actually handled by the company it was said that it was equal to more than three-quarters of its ordinary bulk. It was not true that the American Rapid had been employed by the Western Union to handle delayed messages. The Western Union was fully capable of handling its own business without resorting to any other company.

The strikers are still confident of success and exhibited no indications of weakness. They insist that railroad operators in the west are all out notwithstanding the statements to the company made by representatives of railroad companies.

This will leave Barlow a surplus of about \$3,500,000 after paying off all his liabilities including \$1,400,000 to the Canadian Pacific road. This sale is considered a big "euchre" of the Canadian Pacific Company who supposed that they controlled the Southwestern Road, and cuts off their only connection noston and the Atlantic The purchasing syndicate is believed to represent the Grand Trunk and Central Vermont interests as Hibbard has been working against the Canadian Pacific along. Chapman is here and McIntyre and Stephens of the Camden Pacific have left for New York to interview

The rebels left town and went in the direction of Lagera. Officers and loyal soldiers are pursuing them. Several groups of workmen near Barcelons aised seditious cries yesterday and then fled to the mountains. These are the fresh outbreaks referred to.

## A Rate Cutting War in the West.

Sr Louis, August 9—Yesterday was a tolerably lively day in railroad rate cutting. The Chicago & Allton road and Wabash road have openly sold Chicago tickets at six dollars, but the Illinois Central had not cut up to a late hour last evening. Scalpers, however, have been selling that road's tickets at \$6 for several days. The rate to Louis-ville which was cut to \$5 by the Airline a few days ago, has been reduced by both the Airline and Ohio & Mississippi railroads to \$4.50. All roads between here and St Paul are selling round trip tickets for \$20, and yesterday the St Paul steamers put the fare down to \$24

## Much Needed Legislation.

A great deal of complaint has been hertofore made by persons attending the opera House, and other places of public amusements in the city about the noisy and disorderly conduct of both men and boys, and it has been felt that some legislation was needed to suppress the evil. We are pleased to learn that a member of the Board of Aldermen is preparing an ordinance on the subject, which will be introduced t the meeting of the Board next Mon day and which we hope will be promptly made a law.

He has also built a large ice house in the rear of that building and is now filling it with northern ice. In his new quarters he will have much more room, and the boys who are just dying with thirst for a bottle of Fred's beer just from the ice will have to walk only a few steps farther. To a person who has not visited that part of the city lately, the amount of improvement going on thereabouts, will be surprising.

Seats will be provided at the grounds for the ladies, to whom an invitation is extended to be present and witness the playing.

Arrest and Confession of Thieves. The police yesterday arrested two colored boys named Dave Wade and Jno Owens, on charge of robbing Mr John Henderson's store, on D street, last Monday night. Owens was first captured and had hardly been locked up until he made a full confession, implicating Wade as the chief robber. He stated that on the evening in question, Wade slipped into the store through the back window and concealed himself until Mr Henderson closed the doors and went to supper, when he commenced sorting such goods as he wanted, passing them through the window to Owens, who was stationed outside. They carried off forty pounds of lard and a lot of sugar and coffee. Owens says that the same night, they attempted to break into Jack Street's store, near by, but failed. Jailed on a Serious Charge. A negro man named Frank Tison was brought to the city Wednesday by a party of men from Crab Orehard township and arraigned before Esquire Waring for trial on a very serious charge. The negro was employed by Mr Wm J Taylor to work on his farm, and on Tuesday night he entered Mr Taylor's house and made his way to the bed/room of Mr Taylor's two daughters. The young ladies were wakened by some noise the negro made in entering, and on seeing him in the room they tamped from their bed and ran down stairs. Tison on seeing that he was discovered escaped through a window and made his way to his cabin on the farm near Mr Taylor's house. There he remained until morning when Mr Taylor and a party of neighbors walked in and arrested him. The young ladies had no difficulty in recognizing him, as they get a good look at him in their room and were sure that he was the man. Justice Waring, after hearing the evidence in the case, put Tison under a bond of \$500 for his appearance for trial before the Inferior court. He could not give bond and was accordingly

The news of Mr Will Sloan's marriage to Miss Sallie Rogers, in Celumbia, last Wednesday evening, pleasurably surprised his friends in Charlotte. The ceremony was performed at the Presbyterian church in that city at 8 clock, and the newly wedded immedistely started North via Wilmington on a bridal tour. Mr Sloan is popular in Charlotte, his native home, and has many friends here whose congratulations are extended.

Rev Dr Jerardaugh performed the eremony, and it was witnessed by a large number of spectators in spite of the fact that profound secreey had been observed as to the time and place and no invitations had been issued. The presents received by the bride were numerous and handsome. The bride is a daughter of Mrs A S Rogers and a well known Columbia belle who, in addition to her personal charms and enjoys in an unusual measure the esteem and affection of her most intimate friends. Mr Sloan left Charlotte but a few years since, while yet a youth, and located in New York, engaging in business. By his sterling merit he soon won the confidence of his employers and now enjoys a large and lucrative stronage in the South as a traveling

## The Chance for Our Farmers.

The time is drawing very near for the opening of the Boston Exposition, at which North Carolina will have the handsomest and most complete exhibit of any of the States in the Union. This exhibit is made so as to draw capital and labor to our State, which every one admits is needed very much. The State authorities, that is, the Department of Agriculture, is doing its full duty, and if only backed up by the aid of the peo-ple throughout the State, much good will be accomplished; much capital will come to the State; many factories will be established, and mines of iron, goldetc., opened out. This can be, and will be if the citizens, the farmers, and the land owners in our State will only furnish information so we may furnish to those who are attracted by our State's display. To get the Northern men to settle or invest in North Carolina, we must be able to tell them where they can buy lands for farming purposes, where they can buy water powers, mineral and wooded land, and those who have such for sale should furnish such information. Unless they will place their lands into market, giving it into the hands of some reliable land agency in the State we cannot expect much good to result from the efforts made by our displays.

Every person who desires to sell any real property is urged to furnish Mr John T Patrick, State Immigration Agent, at Wadesboro, with a description, price and terms of the same, and he will assist them to place their lands upon the Northern and New England

## Meeting of the Mecklenburg Bible So-

The Mecklenburg County Bible Society met at Philadelphia church, on August 8th, 1883, and in the absence of both president and vice-president, was presided over by Rev W W Pharr, D D. On calling the roll delegates answered from sixteen churches.

Rev Chas E McDonald, pastor of Steele Creek Associate Reformed church, was present, according to invitation, and delivered a most excellent and instructive sermon from the 138th Psalm, latter clause of 2d verse: "For thou hast magnified thy word above all thy name." The treasurer's report and depositor's report were both read and referred to an appropriate committee, which reported them correct, and they were adopted. The chairman of the executive o Luittee, Gen Young, read the executive committee report, showing that though something had been done in getting up contributions there was a falling off from the year before. The above report recommended that an annual collection be taken up at each anniversary, which was adopted; and the collection in accordance with this

resolution amounted \$14.09. The general agent of the American Bible Society for North and South Carolina, Rev Calvin H Wiley, who was present, added a great deal of interest to the meeting, presenting valuable statistics, information and incidents connected with the Bible cause.

The following officers were elected for the ensuing year, to wit: For President-Rev W T Waller. For vice-Presidents-Rev J T Bagwell and T S Brown.

## Corresponding Secretary-S Watson

Treasurer-E K P Osborne. Executive Committee—Gen John A Young, W B Nesbit, Jas R Hutchison, Jacob Duls, J C Eagle and W T Taylor. The treasurer's report showed that out of fifty evangelical churches in the county that only fifteen have contributed to the Bible cause, and that the fifteen contributing churches had only given \$167.72 during the year. On motion the thanks of the society were tendered to Rev C E McDonald for his interesting and instructive address and also to the congregation of Philadelphia and vicinity for their generous hospitality. The society adjourned to meet at Back Creek church on the second Wednesday in August, 1884.

## Foot Crushed by Car Wheels.

A careless watchman at the Air Line Junction yesterday morning had his foot cut off by the car wheels. His name is George Ewings, and he got between the box cars of a moving freight train, walking along as it moved. He did this hundreds of times before and had never been hurt by it but this time he stumbled and fell, and his foot, which lay across the rail, was run over and crushed by the wheels. Dr H M Wilder who was summoned by telephone, went out to attend the wounded man and found it necessary to amputate the crushed foot. The accident was entirely owing to Ewing's careless-

A Shocking Case of Intanticide. Yesterday afternoon a party of boys rambling through the woods near the Rudisill gold mine, examining the various gold pits, saw a curiously bundled object at the bottom of one of the pits and on examining it, a horrible discovery was made. As the outer wrapping of the bundle was removed the foot of an infant dropped to the ground, and without further ado, they laid the bundle down as they had found it and came to the city to report the circumstance. Dr D O'Donoghue who was in the neighborhood of the pit, was informed of the finding of the body and went to the scene to investigate the matter. He was shown the foot that had dropped from the body, and at once saw that it belonged to the body of a negro baby and that it had been burned. The charred bones and flesh showed this plainly. The body had been wrapped up in a woolen jacket and this in turn was wrapped in a tow sack which had been tied up and east into the pit. The child was evidently newly born and could not have been in the sit than two days. The scene of this discovery is about two miles from this city, at a point between the Rudisill and Bizzell mines. From the appearance of so much of the body as was examined, no doubt remains but that the child had been burned and its charred remains bundled up and thrown into the hole. The jacket, sack and body are in charge of an officer who will produce

them at the inquest to be held to-day. A hard-headed darkey named Green, Who fooled with a kicking machine, The mule's leg was pecied, Which St. Jacobe Off healed, But the darkey - he never was seen.

Nothing New Under the Sun. The Chevalier Frederic Franchetti, ngineer at Leghorn, has referred M de Paruille to a curious passage in Ga-lileo's "Dialogues" touching a possibly early origin of the electric telegraps. In the dialogue Sagrado says that he calls to mind a man who wanted to tell him a secret which would give him the power by means of a certain sympathy of magnetized wires, to speak to any one two or three three thousand miles off. The bargain, however, fell through as the inventor would not try any shorter distance, and Sagrado declined to go to Cairo or Muscouy to try the ex-periment. The story is told in the last number of the Revue Scientifique.
