Where & How to Buy Them.

People are apt to think that if they were only rich enough to be indifferent about the cost of a thing, it would be easy to obtain just what they want in the matter of clothing. If you've ever tried it, you know this to be a fallacy.

Nothing is easier than to spend a lot of money in dressing your boy, but the difficulty is in choosing. One mother considers the beauty of the new garment, another scrutinizes the making, while a third estimates how it will look after a month's wear. We are watchful of all these details, and our experience enables us to determine what will wear better than any one not an expert. We give you the benefit of what we know in the representation of our goods, and it is safe to be guided by our judgment as to the reliability of them, while exercising your own taste as to patterns and style of garment. That we are honest in our desire to serve you efficiently, our readiness to take back goods and refund money is the best test, and at no season of the year can we give you such great value for little money as just now. For in our effort to clear out all remnants and small lots we have placed upon our
