THE RESERVE IS 897,710,000. The Decline Caused By a Withdrawal o \$1,200,000 By New York for Export. Washington, Sept. 9.—The Treasury gold reserve at the close of business to-day stood at \$97,710,000. This decline was caused by \$1,200,000 in gold being withdrawn in New York for export.

In ordinary business the Treasury gained \$400,000 in the exchange of notes for gold at the various sub-Treasnries, of which \$250,000 was gained at Chicago. At the Treasury it is understood that the syndicate will make a deposit to-morrow, which will again make the gold reserve lutact. Since July 13th, the beginning of the gold export movement, about \$21,700,000 gold has been sent to Europe from this country. It is stated that within that time the Belmont-Morgan syndicate has paid into the Treasury in excess of bond requirements about \$11,000,000 in

AN EXPOSITION POSTOFFICE. Station to be Established on Grounds and a Postal Car to be

Washington, Sept. 9.—Acting Post-master General Jones has taken steps to establish a sub-station of the postoffice at Atlanta, Ga., on the exposition grounds to facilitate the mail of the isitors to the exposition.

It was first contemplated to have a railway postal car for this purpose, but upon consideration it was deemed inadvisable. Now a full station will be located on the grounds, and a postal car will be run along side of it to show its workings. A Postoffice Department inspector has been detailed to select a suitable site for the station and car.
