Pikeville Letter.

PIKEVILLE, N. C. April 23, 1893. Dear Argus:—The warm weather the past few days has made cotton look considerable better.

We learn that Mrs. John D. Carpenter will begin a revival here next Thursday night.

We are sorry to learn that Messrs. W. B. Albritton and G. H. Flowers are both confined to their homes by sickness. We wish them both a speedy recovery.

Mr. John W. Bryan and daughter Miss Lela and Miss Fannie Ezzell returned home Sunday from a visit to friends in Nahant township.

A young man of the Piney section came to town last Sunday night to give his "best girl" a call. He left his mule, hitched to his buggy on the street, untied and went in the house and after spending a few hours very pleasantly with the young lady he told her good night and started home. On arriving at the place where he left his mule and buggy, to his disgust he found that they were gone and the young man had to trudge home on foot, a distance of about six miles.

"HOME SWEET HOME."

However, you will never have to walk to your "Home Sweet Home," if you ride one of the CLEVELAND BICYCLES fitted with the Cleveland Thread Pneumatic Tire—the best in the world. It is the best high grade wheel on the market and sold strictly at \$150.00

GIDDENS BROS., Agents, Goldsboro, N. C.

We are also agents for the sale of THE WAVERLEY, the best \$100.00 wheel on the market. It is reliable and guaranteed. Come to see us.

G. & J. The great volume of G. & J. pneumatic tire business which is pouring in upon the Gurnolly & Jeffery Mfg. Co., would indicate that that old reliable pneumatic is holding its own, notwithstanding the number of new tires put on the market. It is a noticeable fact that those very people whose only objection to the G. & J. tire was the corrugated tread, now insist upon having nothing but the corrugated tread. These tires are now furnished with either smooth or corrugated surface, but the percentage of smooth surface tires ordered is very small. The fact that this tire will not fall off when deflated, makes it a leader among detachable pneumatics.
