> It is altogether too early to accept the Wall street betting, or rather bluffing, as a sign of the drift of public sentiment The independent voter will decide this contest, as he has decided pravious contests, and is reasonably plain that he has not decided how will vote. He will, as a fact, take four months to consider the subct, and when he decides he will not be likely to take any one into his confidence. The inde pendent voter is a man who does his own thinking and voting, and he can not readily be gulled by rider nonsense.
