

Two Ways of Putting It.

A WORTHY QUAKER ONCE WROTE: "I expect to pass through this world but once. If, therefore, there be any kindness I can do my fellow being, let me do it now; let me not defer nor neglect it, for I will not pass this way again."

THIS IS OURS: We expect to pass through this world but once. But, lest, through some unknown circumstances, we should have to come again, we propose to make our work of such quality that it will be so well remembered at our second coming as to guarantee us a good business.

The Osborne

Reaper and Binder, Self & Hand Dump Rakes, Disc and Rival Disc Harrows, Cultivators & Mowers.

Car load of Cooking Stoves just received. Price from \$7.50 to \$20. Every stove with our name on it and fully guaranteed to give satisfaction, or money refunded. Don't wait, but come and buy while the prices are right.

Hot Water and Steam House Heating, Plumbing and Roofing a Specialty.

The John Slaughter Co.

Walnut Street, Near Court House, Goldsboro, N. C.

Fertilizers.

If you want the Best Fertilizer on the market for almost all kinds of crops, come to see us and get the N. C. Alliance official guano.

With the use of the Alliance official last season Mr. B. B. Williams, of Grantham's Township, raised over \$400,000 worth of tobacco on two acres of land, some of it bringing \$57.00 per hundred.

We also sell the Genuine Bone and Peruvian guano, which is a little cheaper, Acid Phosphate, Kainit, Bone and Potash Mixture, Muriate and Sulphate of Potash, Nitrate of Soda, and cotton seed meal.

IRON AND CONCRETE.

New Method of Construction in the Netherlands.

The Amsterdamse Fabriek van Cement Yzer Werken has furnished United States Consul Hill, at the Amsterdam office, with the following description of a new system of construction which is used in the new Postal Savings bank building of that city, now approaching completion, says the Washington Star:

"In the Monier system of building an iron framework, looking much like a birdcage, is entirely enveloped in concrete of Portland cement, which prevents the iron from getting rusty and at the same time renders the concrete elastic. The iron, or rather steel, acts entirely in tension, the concrete in pressure. This construction is at once strong, fireproof and waterproof and entails no outlay for repairs.

"Patents have been taken out in various countries, and in Germany a joint stock company, with a capital of 2,500,000 marks, has been formed. An establishment of concrete iron works has been opened in the province of Zeeland and another in Amsterdam. This company has made a number of experiments, resulting in the application of the construction, described as an economic substitute in many cases for T constructions, generally used heretofore.

"Floors without beams measuring 7 1/4 by 7 1/4 meters (24.6 feet) and 8 1/4 by 8 1/4 meters (27.9 feet) have been constructed for the Postal Savings bank at Amsterdam, and a floor of 300 square meters (3,228 square feet) constructed as a whole with beams is about to be made for a government building at The Hague. Complicated formulae being required in the calculation of concrete iron floors and beams, the directors of the company have had some graphic tables drawn up which enable them to find at a glance the necessary data for the work. These calculations and tables are kept strictly secret.

"This system is growing rapidly in favor in all European countries in the construction of government buildings and in manufactories. It is believed that in a comparatively few years it will have replaced brick, wood, iron, etc., in the building trade. The method is specially adapted for bridges. The Monier system will undoubtedly meet with considerable success in the new world, as many tanks, etc., now made of concrete only could be conveniently constructed of concrete iron."

LOOK LIKE WAVES OF FIRE.

Phosphorescent Condition of Pacific Ocean Attracts the People.

The remarkable phosphorescent condition of the ocean along the coast of southern California continues to attract great attention, says a special dispatch from Los Angeles to the St. Louis Globe-Democrat. Special trains to Santa Monica, Redondo, Long Beach and Terminal Island carry thousands of people nightly to see the phenomenon.

The other night the sea was higher than any evening before since the display began, and the light was consequently greater. As waves from 10 to 15 feet high broke along the beach they presented the appearance of walls of green tinted fire, and at times the whole surface for miles seemed ablaze, making a display that was almost startling.

A New Type of Hunting Launch.

At the Jacob yard on City Island, N. Y., a very able type of hunting launch, designed by C. D. Mower, is being built for Mr. Jacob's use about the yard and sound, says the New York Times. A cabin eight feet long is set at the fore-head part of the boat, which will allow sitting head room of 4 feet 6 inches. A toilet room is situated in the forehead end of the cabin, and berths are situated on each side, at the end of which are two hanging lockers. Aft of the cabin is a 14 foot cockpit, with seats running full length on both sides. The engine, probably of the gasoline explosive type, will be set well forward near the center of the boat. The overhanging bow will protect the boat from pitching in rough seas, thereby making her an able dry hunting boat for all kinds of weather.

Advice For a Coronation Oath.

King Edward is said to be puzzled in mind regarding which form of oath would be best to use at his coronation. Why doesn't he play golf, says the Boston Herald, on a hazardous course awhile and try all of them?

A dispatch from Angouleme, France, reports that an invasion of locusts has taken place throughout the department of the Charente, more especially in the canton of Bonillac, where they are so numerous and so voracious as to constitute a veritable scourge. Enormous fields of beans and beets have been devastated in a few hours.

E. A. Martel, the French explorer of caverns, whose discoveries underground have attracted much attention, reports that he has found in the department of Hautes Alpes a cavity in the form of a "natural well" whose depth exceeds that of any other known. He has sounded it to the depth of about 1,027 feet, but the actual bottom has not been reached.

Phenix, A. T., the center of Salt river valley, was a few years ago a sagebrush desert. It has now 25,000 inhabitants, with an assessed property valuation of \$10,000,000. All this is due to water, which, brought in canals from streams fed mainly from the San Francisco and other Arizona reserves, has turned the desert into a fertile valley covered with ranches and dotted with small towns.

Statistics of the country relating to physicians indicate the possibility if not the actuality of overcrowding in the medical profession. It was found in the census year that there was one registered physician to every 655 people in the United States.
