Told by Pain If you have pains you should look after them quickly. Pain shows something is wrong. The sharper the pain the more dan-ger there is in delay. There are thousands of women to-day who are bearing awful pain almost continually, rather than tell a physician about the shooting pains in their lower abdomen, about the second fallian

lower abdomen, about the agony of falling of the womb and the distress of leucorrhoea. They let the months pass and their trouble becomes harder to cure and more distressing. But modest women can secure exemption from the embarrassment of a private exami-nation. When pain tells them of danger they can cure themselves by the use of

WINE OF CARDU in the privacy of their homes. You can be cured without distressing publicity. With these facts before you there is no reason for

the delay which is increasing your misery and wasting the days of your life. Why not stop the pain today? Belen, Miss., March 9, 1900.

I have used one bottle of Wine of Cardul and one package of Thedford's Black-Draught. Before I began to take your medicines I had pains in my back, hips, lower bowels and my arms. Sometimes I thought I would go blind. My head ached and I was so weak I could hardly walk across the foor. Now I can only feel a little of the pain in my side and I am going to use your medicines until I get eured, for I believe they will certainly cure me. I have been married twelve years and am the mother of seven children. I thank you for your wonderful medicine and what I has done for me.

When I first filled the tank, about two weeks go, after jutting in about 100 gallons of water, I pumped in an air presare of 5 pounds which consumed time of one hand about an hour only; ut, much to my astonishment, I have never had to renew this power; the impressed air seems to retain its elasticity. I keep the tank only oneand to one-ball full, which gives a pressure of 5 o 10 lbs. Every morng I have 100 to 200 galions pumped in, which is a small job, about balf our, and this lasts until next morning, the compressed air would force very gailon out of the tank. If I had your business I would put 1,000 of hem in this state alone under a guarantee of giving perfect satisfaction Yours truly,
