Entered at the Postoffice in Goldsboro as second class mail matter.

The Sultan simply stood ready to say Kismet to the victorious Young Turks.

The lion casualty list in Africa will now divide attention with the baseball scores.

What the country needs most is a revision downward of the Aldrich influence.

Turkey and Persia are finding the twentieth century a period of trouble and hardship.

The Frenchman that Mr. Roosevelt put into the Ananias Club did not enjoy his promotion.

Carrie Nation will raise on her Arkansas farm hickory hatchet handles. It is her best crop.

The affair in Turkey was a compromise. Abdul Hamid lost his throne and kept his head.

Fisherman Patten prefers to angle for trout instead of suckers at this stage of the game.

The gnus that Mr. Roosevelt shot are not dangerous animals, although they rank among big game.

The boom at Beverly is already prospering. Summer capitals must make hay while the sun shines.

It does not yet appear why Diaz wept when he was told that he must serve another term as President.

Let no congressman who votes against an income tax think he can placate his constituents with garden seeds.

It does not seem to be settled whether Abdul Hamid has 4,000 wives, or only 40. The difference is very considerable.

A railway running into Chicago gave each woman who bought a ticket a box of candy until it was pronounced rebating.

The Standard Oil people carried their Texas fine, \$1,714,000, in an old coffee sack. They must have a warehouse full of them.

They are looking up reactionaries in Constantinople, and this country would be better off if the plan were adopted in Washington.

The fear is that Mr. Roosevelt will return with a petulant liver. Rudyard Kipling says he has no chance to come home with a sound liver.

## HONESTY IS THE BEST POLICY.

The most astute politician in all Europe, the man who has played one power against another thirty-three years, with remarkable success, has lost power at last. He has fallen because he intrigued against a constitution he had agreed to support. He has fallen, not because of any failure of his complex foreign policy, but because he had lost support at home, especially in the army.

In his great game of playing both ends against the middle, the Hamidian regime never failed to appeal to the fanaticism of the followers of the great Mohammedan faith. All told, those followers number about 175,000,000, or rather more than all the Protestants in the world. Because he was the head of all those religionists, he was retained in the revolution of last July, but his capacity for intrigue has at length been his undoing.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

## AMERICAN BRAINS.

All nations vie with each other in honoring the Wright brothers for their achievements in the use of heavier-than-air machines. They signaled their experiments at Rome by forcing the aeroplane over the grass by its own propellers until it sailed gracefully and swiftly into the air. No starting device whatever was used, and Wilbur Wright says all starting advantages will soon be abandoned altogether. When it is known that an aeroplane can be started anywhere at any time a great advance in aviation will have been established.

The truth is, the conquest of the air is advancing much faster than the conquest of the water did for the latter covered centuries. It is coming on much faster than the locomotive did, for that consumed fully fifty years. It is coming on even faster than the automobile did, for the first ones were used twenty years ago, and ten years ago they were considered untrustworthy. It has taken twenty years to bring automobiles fully up to the commercial stage.

The Wright type of aeroplane was put before the public last summer, and the progress made since that time is marvelous. How soon the aeroplane will become commercially available cannot exactly be foreseen, but the pace of the Wrights has been rapid and barring accidents it may continue to be so. They are studying the problem daily and as they work the year round the aeroplane which requires no roadbed and which is not in itself expensive may be rapidly developed. Hundreds of acute brains are at work, spurred on by the success of the Wrights, and the air may soon become as useful in a transportation sense to man as the water is.

## S.S.S. NATURE'S PERFECT TONIC

Something more than an ordinary tonic is required to restore health to a weakened, run-down system; the medicine must possess blood-purifying properties as well, because the weakness and impurity of the circulation is responsible for the poor physical condition. The blood does not contain the necessary quantity of rich, red corpuscles, and is therefore a weak, watery stream which cannot afford sufficient nourishment to sustain the system in ordinary health. A poorly nourished body cannot resist disease, and this explains why so many persons are attacked by a spell of sickness when the use of a good tonic would have prevented the trouble. In S. S. S. will be found both blood-cleansing and tonic qualities combined. It builds up weak constitutions by removing all impurities and germs from the blood, thus supplying a certain means for restoring strength and invigorating the system. The healthful, vegetable ingredients of which S. S. S. is composed make it splendidly fitted to the needs of those systems which are delicate from any cause. It is Nature's Perfect Tonic, free from all harmful minerals, a safe and pleasant acting medicine for persons of every age. S. S. S. rids the body of that tired, worn-out feeling so common at this season, improves the appetite and digestion, tones up the stomach, acts with pleasing effects on the nervous system, and relieves every portion of the body.

From "Mutual Interests," August 1908:

Wilmington, N. C., July 3, 1908.

Milton McIntosh, Manager.

Dear Sir: I beg to thank you for your statement handed me today, showing results of Mutual Life Insurance Company of New York, policy No. 232,424, which I took out with that company twenty years ago. The terms of the settlement set forth in the statement and offered me by The Mutual Life are eminently satisfactory to me; in fact, I did not expect to receive as liberal a settlement as your company offers in the final adjustment. The policy has not only given me full protection for the period I have carried same, but has proven to be a veritable savings bank, as, in addition to the full paid-up policy for its face value, it has returned me a substantial surplus. I note from the statement that I will receive 3 per cent. compound interest as a dividend on the face value of the policy. In this connection, I have no hesitancy in stating that I look upon The Mutual Life Insurance Company of New York as one of the most substantial financial institutions in this country, and a company that will not only protect its patrons, but will give entire satisfaction to anyone who desires to provide for their family through life insurance or make an investment for themselves in their old age.

Very truly yours,
