How to Increase the Yield of Fruit

Increased fruit crops are more often the result of good management than of good luck. Fruit trees and fruit plants need a liberal supply of

Virginia-Carolina Fertilizers

The trees absorb plant foods—that is, nitrogen, phosphoric acid and potash—from the soil just the same as any other crop. Experience has shown this over and over again. This truth has become so well recognized that "return to the land what the tree removes if you would expect the best results" has become an axiom with the best growers.

Apple, pear, peach, orange and other fruit trees soon respond to careful fertilization. But be sure to use the best fertilizers.

"I made a test with other companies' fertilizers," says Mr. H. O. Lowry, of Manatee County, Fla., "and yours proved to be the best. The yield where I used Virginia-Carolina Fertilizer, was just twice as much as where the other two companies' fertilizer was used." Hundreds of users say Virginia-Carolina Fertilizers are cheapest because of their good qualities—give better satisfaction and quicker results.

Many facts of great interest and value to fruit growers are published in the new 1909 Farmers' Year Book, a copy of which will be sent free on application to any of our sales offices.

WILL HOLD COOK'S RECORDS.

"Sorry," Says University of Copenhagen, "But We Must See Them First."

Copenhagen, Oct. 20.—The University of Copenhagen has declined to forego its privilege to the first examination of the north pole records of Dr. Cook. The authorities of the university cabled today to the National Geographic Society at Washington the following:

"Sorry, University not able to comply with your request."

Dr. Cook had promised to submit his records to the faculty of the university here, but on October 15 the university was requested to waive its claim of priority in favor of the National Geographic Society, which sought an early determination of the controversy which has arisen the result of Commander Peary's tree that Dr. Cook did not discover the north pole.

Polar Dispute Adjudicators.

Washington, D. C., Oct. 20.—An even dozen members of worldwide standing constitute the research committee of the National Geographic Society, which is to pass on the matter of the north polar controversy. Its chairman is Henry Gannett, the geographer of the United States Geological Survey, vice-president of the National Geographic Society and one of the founders of that organization in 1888. He is the author of graphic surveying books, statistical atlases of the tenth and eleventh issues, the dictionary of altitudes, other books of government report geography, magnetic declinations.

The other members are O. P. Meyer, chief of the government bureau of statistics and secretary of the National Geographic Society, and author of books on territorial expansion; Dr. L. A. Bauer, director of terrestrial magnetism of the U. S. Geographical Institute; Rear Admiral C. O. Chester, known for many years as one of the best navigators in the navy; Frederick V. Coville, botanist of the Department of Agriculture; J. Howard Gore, formerly professor of mathematics in George Washington University; Gilbert H. Grosvenor, editor of the National Geographic Magazine; C. Willard Hayes, chief geologist of the United States Geological Survey; Alfred J. Henry, professor of zoology in the United States Weather Bureau; W. H. Holmes, chief of the Bureau of Entomology; Dr. C. Hart Merriam, chief of the United States Biological Survey, and Dr. O. H. Tittmann, one of the founders of the National Geographic Society.

From Every Part of the Country Delegates Have Poured Into the City.

Omaha, Neb., Oct. 21.—Thousands of white-ribboned women on the streets and in the railroad stations, hotels and other public places today gave evidence of the fact that the national convention of the Woman's Christian Temperance Union is at hand. From every part of the country the delegates have been pouring into the city during the past twenty-four hours, and by the time the opening prayer is said tomorrow, one of the largest gatherings at any national convention in years is expected to be on hand.

Several receptions were held in different parts of the city today, and there was general activity among the delegates in anticipation of the opening of the convention. The official board held a meeting to complete the preparation of the annual reports and to put the finishing touches to the convention program. The sessions of the convention will continue through next Wednesday night. On the program as speakers are many of the foremost women temperance workers in the country. Several public men of prominence and a number of noted divines will also be heard during the week.

The present convention marks the close of the thirty-fifth year of the well-known organization. Though local and section organizations had existed for some years previous, the national W. C. T. U. was given birth at a convention held in Cleveland in November, 1874. The first officers were: President, Mrs. Annie Wittenmyer, of Philadelphia; corresponding secretary, Miss Frances E. Willard, of Chicago; recording secretary, Mrs. Mary C. Johnson, of New York; assistant recording secretary, Mrs. Mary T. Burt, of New York; treasurer, Mrs. W. A. Ingham, of Cleveland. The announced purposes of the organization were "to educate the young, reform the drinking classes, and to see the abolition of the liquor traffic."

For Sale!

One new eight-room two-story house, three cabinet mantles, good teology in the United States Weather Bureau; W. H. Holmes, chief of the Bureau of Entomology; Dr. C. Hart Merriam, chief of the United States Biological Survey, and Dr. O. H. Tittmann, one of the founders of the National Geographic Society.

Billingsgate is the chief element of New York politics at present.

Women Suffer Age from Diseased Kidneys

And Most Women Do This Not Knowing the Real Cause of their Condition

These poor, suffering women have been led to believe that their misery of mind and body is entirely due to "ills of their sex." Usually the kidneys and bladder are responsible—or largely so. And in such cases, the kidneys and bladder are the organs, that need and must have attention.

Those torturing, enervating sick headaches, dragging pains in back, groin and limbs, bloating and swelling of the extremities, extreme nervousness or hysteria, listlessness and constant tired, worn-out feeling—are almost certain symptoms of diseased and diseased kidneys, bladder and liver.

DeWitt's Kidney and Bladder Pills have, in thousands of cases, been demonstrated as remarkably beneficial in all such conditions of female organism—affording the most prompt relief and permanent benefit.

As an illustration of what these Pills will do, Mrs. P. M. Bray of Columbus, Ga., writes that she was very ill with kidney trouble, and that she is now well—and that these Pills are what cured her.

They are very pleasant to take, and can, in no case, produce any deleterious effect upon the system—as a syrupy, alcoholic, liquid preparation are apt to do.

E. C. DeWitt & Co., Chicago, Ill., want every man and woman who have the least suspicion that they are afflicted with kidney and bladder diseases to at once write them, and a trial box of these Pills will be sent free by return mail post-paid. Do it today.

WOMAN'S NATURE

Is to love children, and no home can be happy without them, yet the ordeal through which the expectant mother must pass usually is so full of suffering and dread that she looks forward to the hour with apprehensions. Mother's Friend, by its penetrating and soothing properties, allays nausea, nervousness, unpleasant feelings, and so prepares the system for the ordeal that she passes through the event with but little suffering, as numbers have testified and said, "it is worth its weight in gold."
