COL. ASHLEY HORNE.

Hon. Ashley Horne, a prominent candidate for the Democratic nomination for Governor, has been in town a day or so this week shaking hands with his friends and making new acquaintances. He met many of our people and made a favorable impression on all he met. He is a man of plain practical business sense and makes no claims to being a brilliant politician. He is quietly going over the state and meeting the people and asking for the nomination for Governor, assuring all, that if he is the choice of his party, he will give the state a quiet business like administration of its affairs, as far as the duties of Governor are concerned. Mr. Horne came home from the war nearly barefooted and went to work cutting cord wood at 50 cents per day and now he is one of the largest taxpayers in the state. He farms extensively, running 60 to 70 plows and is largely interested in merchandising manufacturing and banking. In fact, he is one of the most successful business men of the state. In addition to this, he is a man of unquestioned character, being esteemed most by those who know him best.

These things being true, the people of North Carolina have an opportunity of securing an exceptional executive at a time when every one realizes the need of just such an administration as Mr. Horne will give.

Two Things That Ought To Receive The Full Force Of The Law.

Monroe Journal.

There are two widely differing offences against the law and society that ought to be hit with the full penalty of the law every time, but which the law, by a speak-easy course, is really helping to make more pernicious in this county.

One is the habit of carrying concealed weapons. Every time a court of justice lets off a pistol-toter with less than the full penalty it encourages some other law-breaker to stick a weapon in his pocket, ready to shoot down somebody on the first excuse.

The other offence is embezzlement. When a man steals money that has been intrusted to him, it is too common in this section of the country to let him slip out of it if the amount of the defalcation can be squeezed out of his relatives or friends. There are doubtless few towns in this section of the South, and for aught we know, elsewhere, that have not had one or more cases like this. If every embezzler and defaulter were made to suffer for his misdeeds, instead of letting the thing be hushed up, there would soon be a slacking up in the painful frequency of such misdeeds. How many such cases does everybody know that have never been carried to a court of justice?

Judges and grand juries and solicitors need to look after these two crimes.

A Card.

As a Democrat of Caldwell I wish to suggest to the party, Mr. W. L. Minish, for the office of Register of Deeds.

It is unnecessary to dwell on Mr. Minish's ability or fidelity to duty, for it is generally known that whatever office has been entrusted to his care, either political or otherwise, has been filled in such a way as to reflect the highest credit to him and meet the approval of his friends.
