Offenses that have heretofore been winked at are now under the whip of Justice; the mask is being torn away, and offenders appear before the public in all their horrid deformity. It is Law asserting its authority: Crime dragged from its lurkingplace to receive its condemnation in the assize of the people.

"But, the courts in the Indian Territory present a travesty on Justice." Please remember that it has been only a little while in which it has been possible to have courts in the Indian Territory. Not long ago it was the region of savagry unrelieved by a single ray of civilization. The tomahawk and the scalping knife were the ministers of justice between man and man.

Look where you may, and there is light in the darknes. The wheels of civilization are not turning back on their axles. The car of Obristianity has not halted in the wilderness of sin.

Onward is the watchword and reply in the city and upon the plains. Right onward to higher attainments and nobler conquests.

nôlyr. The Were and Plant Kingdom.

Though Emerson suggested that every weed is a plant whose use is not yet understood, the number of plants that have been brought into service by man is very small, Edson S. Bastin finds authority for the statement that 1192 specie have been at some time cultivated as food, and that the total known to have been used as food is 4090 But many of these are of little value, and "Swith's Dictionary of Economic Plants' gives only 515 species as those important for any

For medicine some 3,000 plants have been employed, of which the United States Dispensatory enumerates 1300, while 244 are given in the Pharmacopoeia. The plants not yet investigated offer great possibilities, which, however, can only be developed by long and extensive government experiment. The named species may by taken as about 175,000, and possibly as many more remain to be discovered, while many species are capable of great variation through cultiva-

The apple had yielded about 1500 different varieties up to a few years ago, yet some other species of the genus may be quite as capable of useful development.

The different varieties of wheaare believed by some to have had their origin in an unimportant torage grass, and a wild plant still growing on English and French coasts has given us the white and red cabbages, cauliflower and perhaps even the common turnip. From the little explored field of bacteria and tungi may be expected many useful products.
