The fact that the cotton movement this year is two to three weeks earlier than usual is going to make trade increase so much sooner, and it will be the wise man who recognizes this and places himself in the way to be benefitted by it.

The opening of schools and colleges is another important trade factor, although many fail to appreciate it. If the actual figures were obtainable, it would be found that as promoters of the circulation of money and activity in a community, there is nothing like colleges and schools. The coming of scholare from outside places gives the boarding houses business, and this is reflected throughout the community.

While the coming home of the summer tourists and their taking hold of business and giving things an impetus. the increased trade as developed by cotton arrivals, and the fish business which each week will grow as the weather becomes cooler, and to these may be added the other products which will come

A Great Historic Tablet. This tablet is over 10 feet high. over 5 feet wide and over 1 foot thick, of one flawless block of very fine-grained granite, or rather, syenite. It was first cut by one of the most sumptuous Kings of Egyyt. Amenhotep III., brilliantly polished as flat and glassy as a mirror, and engraved with a scene of the King offering to Amen, the God of Thebes, and an inscription of about 3000 hieroglyphs recording his offerings and glorifying the god. His son, Akhenaten, who strove after a higher faith, erased all figures and inscriptions of Amen, and so effaced

most of his father's fine carving on this great tablet. This, however, was all re-engraved by Seti I., about 50 years later, as a restoration. Then, some two centuries after it had been erected in the temple of Amenbotep III., Merenpath cast an envious gaze on the splendid stone, and stole it for his own purpose.

it is very evident that New Berne needs manufactures to become a truly all-the-year-city of commeroial activity, spreading prosperity of the King offering to Amen, and among her citizens and the farmers of this section.

It is not a question of no capital being obtainable for enterprises in New Berne, for this can be found in sufficient amounts among our own people, and it is for those who have the capital to make its presence felt in New Berne, by the establishment of industrial plants.

A move of this kind is not alone one of philanthropy and public spirit foundations, heaped over with a it is one of profit to the promoters, foot or two of stone chips, this grand for there can be no question that block had lain since about the time manufactures of several kinds can of the Trojan war.
