EDITORIAL PARAGRAPHS

This is proving to be an unusually

with so many political changes place, the wildest rumor now ands plenty of believers.

Candidate W. A. Guthrie is going have a hard time to make his tical peace with the Biblical

According to late reports Judge cell and Zeb Vance Walser are rading Eastern North Carolina are rapidly dying out and that the sun is sure to burn out and become th free silvet speeches.

If the Statesville Landmark is not e careful in publishing original tical poetry, it will be accused graver political backslidings than ting such poems.

The statement going the rounds the North Carolina press, that banks of this State report only ety dollars in gold in their vaults I indicate that free silver had ady come to this State.

The News-Observer's attention i tfully called, since it has gone the business of reforming the s of this State, to its city conporary, the Press-Visitor. If N.-O. will carefully read the mns of its contemporary it may d several matters on political tters which certainly, from the -O. standard, demand reform. ter this, the State is before the 7.-O. Let reforms begin at home.

Principle is Principle.

We read every day in the daily about "fusion" and "co-

Spätnlations al to Dosiblaty. The probable fate of the last man ine often been discussed and dozens of theories have been advanced by persons who honestly believe that they have solved the problem. That there will be a time when this little world of ours will us longer exist there is not the least shadow of a doubt. But exactly how the human race will perish and disappear from the face of the globe is the question that has interested the philosophers of all ages.

Some profess to believe that the ceans are gradually encroaching on the land surface, and that eventually the last man will be drowned.

Opposite to this is the much-talked-of theory that the water on the earth's surface is slowly drying up, the amount being appreciably less now than it was at the opening of the century. The spostles of this unique theory say that if the diving up process continuos for a few thousand years longer the earty will become as arid as the moon and the last man will perish for want

of water. Some believe that the earth will

fall to pieces; others, that a monster political year for the campaign planet will plunge into the sun, causing that great luminary to blaze up and burn to cinders the carth and the other planets in its train.

There have been dozens of other theories, some of them equally curous, advanced by men who have

been making the subject a study. But the most remarkable solution of the question is the opinion lately expressed by a leading German me-

teorologist and astronomer. He says that the internal fires of the earth

are rapidly dying out and that the cold and durk. This, he says, is proven by the fact that ice is rapidly accumulating at the poles of the

earth and slowly creeping down toward the temperate zones. Places visited by Kotzebue, Franklin, Ross, Barry, Lyon and others during the

first quarter of the present century, and pronounced by them as being free from ice during June, July and August, and are now covered with several feet of the crystal deposit Best Patent Dindem and Charm. We which is capped with snow through- buy our Meats, Lard, Coff. e and Tobacco out the year. This certainly proves

that the earth's glacial zones are headquarters, call in, examine goods, and particular and normanently enlarging, get our prices. ROBERTS & BRO. rapidly and permanently enlarging. and that the old German apostle of the freeze-out theory has a basis for his calculations, to say the least. That Europe is on the borderland

of another glacial epoch has been shown by Flammarion, the great French speculative astronomer, During the last fifty years every kingdom, empire, republic and kingdom, empire, republic and & F. Pills for health. One Dollar by principality in that country, as well mull or at store. For sale by F. S. Duff J
