HIGHWAYS TO THE SEA.

The improvements made at Ocra coke which gives a water depth there of nine feet at low water, makes it necessary that an increased water depth be secured for the Neuse river below this city, so that New Berne may have a water highway to the sea in that direction.

The estimates have already been made from surveys, to secure an eight foot depth of water, with r width of 300 feet in the Neuse river below this city, which would make the increased water depth at Ocracoke available for the commerce of New Berne, and give a fine outlet in that direction to our maritime interests.

While this survey and estimates have been made, it is not certain maybe not for very long-the day that the necessary appropriation can be secured for the work, and it ought to be seen to, that this matter receives attention at the hands of our Congreesman at Washington, for it is said that nothing further than the survey and estimates may come of it.

This improvement of the Neuse below New Berne is of the greatest importance to the city's commercial interests, as it will enable many vessels to come to this city which cannot at present pass up.

In addition to this water highway via Ocracoke, the merchants and she's a brick .-- Wash. Star. business interests of New Bern ought to endeavor to secure an out let at Beaufort which could be done by having Clubfoot Canal deepened and widened.

AGE AND CHARACTER.

which the founder of the JOURNAL, J. W. Harper, established for it, which Age has only added to it, gives it a reputation for being true to its motto, "Independent in all Things," has been fully sustained by Mr. Harper's successors, and to-day the NEW BERNE JOURNAL stands for an Honest and Clean Journalism, at the same time being an up-to-date Newspaper.

The present management of the JOURNAL has been adding many new features of improvement to the JOURNAL, and in a short time some important additions will be made, of which due announcement

will be made.

Berne, but Beaufort and this entire section as it would put it in closer communication with the Southern and West Indies trade.

Here are two grand and important water outlets which can be secured for this city's commerce, and it ought to be the purpose and effort of every citizen of New Berne to work towards securing these great water highways which would lead to the advancement and development of our port' severy interest.

New Berne merchants say they want more business, here is one way to get it by putting this city and section in closer and better communication with the outside trade markets.

A little practical work on this matter will accomplish great things for New Berne's commerce. Let the effort be made at once, and let every one assist in the movement,

The Turk, and Slavery.
