TARIFF BILL REPORTED.

That Important Measure Was Presented to the Senate.

Debate on It Begins Next Tuesday. Republicans Say the Bill is a Moderate Measure. They Are Confident of Its Passage and Count Upon Kyle and Jones.

WASHINGTON, D. C., May 4.—The presentation of the tariff bill to the Senate took both sides of the chamber by surprise. Although the Republicians were desirous that the bill should not be kept in the committee for any protracted period, they had not expected to report it to the Senate with so little delay.

The managers of the Republican side of the Senate express perfect confidence in their ability to pass the bill as reported. Notwithstanding this, it is apparent they are not quite as confident as they wish to appear. Party discipline will undoubtedly rally all the regulars to the support of the measure, more especially as it includes concessions to all, or nearly all, the interest on the Republican side of the chamber. Probably Mr. Kyle will not fail, yet there will be more or less uneasiness until the whole thing is done with.

As Senator Jones there seems to be no further doubt about his position. He said after the bill had been reported to the Senate that he had always been a protectionist, and the bill met his approval in nearly every respect.

The comments on the bill are, of course, partisan. Some features are very much disliked by even Republicans, but, on the whole, the Republicans commend and the Democrats condemn it, though members of the committee say the subcommittee has, in many particulars, improved upon the Dingley bill. The new bill is radically different from the Dingley bill, practically amounting almost to another measure. Many important schedules were rewritten entirely.

In reporting the bill, Senator Aldrich gave notice that it would be called up on Tuesday, the 18th instant.

The date to take effect is made July 1, 1897, instead of May 1st, as provided in the House, and the words in the first paragraph, "or withdrawn for consumption," are stricken out.

The tariff on wool is reduced as to the higher grades and raised as to the lower. Hides are made dutiable at 15 cents a pound and lead ore is rated at the same figure.

The duties on imported tobacco have been decreased about 50 cents a pound. Tea is taxed 10 cents a pound, and beer is made to pay an additional 4 cents a barrel.

The sugar schedule has been completely revised, and is now a composite of a valorem and specific duties, the latter being a higher rate than was ever imposed before.

Lumber remains practically as it was in the House bill at \$2 a thousand feet, but coal has been decreased from 75 to 60 cents a ton.

The House provision relating to reciprocity has been stricken out and an entirely new section substituted.

The fate of the Hawaiian treaty is also another important question in connection with the tariff bill. The House bill contained the usual clause exempting from the operation of the tariff 100,000 cigars imported from Hawaii. This provision has not been reinserted in the Senate bill, but it was left out because an amendment is to be framed modifying the treaty, and it is expected that this amendment will be offered and be passed in the Senate.

Until this proposed action of the Senate Finance committee became known there was considerable talk as to whether the omission of the exemption clause would be a practical abrogation of the treaty. This question, however, may be answered in the negative.

It was the general expression of the Democratic members of the Finance committee that there would be no factious opposition to the passage of the bill, although occasion will be taken to point what are said to be its inequities. The sugar schedule will be made an especial point of attack, and several anti-trust amendments will be offered and pressed to a vote.

HORROR IN PARIS.

Two Hundred Persons Perish in a Fire and Panic at a Charity Bazaar.

PARIS, May 4.—An awful disaster has turned the fair French capital into mourning. About 4 o'clock fire suddenly broke out in a temporary wooden structure in the Rue Jean-Goujon, while it was crowded with people attending a charity bazaar under the patronage of the Duchess d'Uzes and other well-known ladies of the French aristocracy.

One hundred corpses have been laid out in the Palais de L'Industrie. It is believed that another hundred are beneath the ruins. The wounded are known to number at least 180.

The building was a temporary wooden structure 300 feet long by 180 feet wide. The woodwork was concealed by hangings and paintings on canvas arranged so as to represent a street scene of old Paris. The bazaar was opened yesterday. Fifteen hundred to two thousand persons were present today.

It appears that the fire originated on

the left side of the bazaar. In a few moments the flames spread along the whole side of the bazaar. The roof and almost the whole building soon collapsed, falling upon the unfortunate people.

In spite of the efforts of the firemen, some time elapsed before the charred bodies could be pulled from the smoking and burning mass of debris covering the spot which, but a short time before, had been the scene of so much gaiety.

Cabinet ministers, ambassadors, noblemen and members of the highest social and financial circles were side by side with the lowliest and poorest, anxiously inquiring for their missing relatives.

In the streets adjacent to the bazaar were long lines of sumptuous equipages. Most of these returned empty; their owners were dead.

CENTRAL HOSPITAL DIRECTORS.

Governor Appoints Three to Fill Vacancies. Old Directors Would Not Hold Over.

SPECIAL TO JOURNAL. RALEIGH, May 5.—Governor Russell today appointed James G. Williams, J. T. Rogers and Jesse G. Ball, all of Wake county, as Directors of Central Hospital at Raleigh.

The three old Directors whose terms expired do not propose to hold over, and so there is no difficulty as to these new men.

This information is given out at the Executive office.

THE STATE CAPITAL.

Supreme Court Reports. Meeting of Directors of Insane Asylum.

JOURNAL BUREAU. RALEIGH, N. C., May 5. Yesterday copies of the 119th Supreme court reports were sent out from the governor's office to the governors of the different States, the Dominion of Canada, Australia, New Zealand and Tasmania.

The old board of directors of the Insane Asylum here met this morning. The principle business of the board was to elect two assistant physicians, a steward and a matron.

Mr. and Mrs. Chas. E. Johnson, their daughter Miss Mary, and Miss Eleanor Vass, leave on Monday for New York and on the 15th they take steamer for Liverpool, and will spend the summer abroad. Mr. Johnson is one of the largest cotton buyers in the South.

The health officers report for the month of April shows only 14 deaths and 21 births. This death rate shows the city to be remarkably healthy.

Last night the old board of aldermen met for the last time, and at noon today the new board, and the new city officers were inducted into office.

Today the vestibule train bearing delegates to the Baptist Convention to be held in Wilmington passed through here, and took dinner at the Park Hotel.

Mr. R. H. Battle, President of the State Agricultural society has appointed the State Fair executive committee. There is quite a long list of them.

The colored fire company that lost its hose and engine by fire last month is to have a new brick building for its headquarters and a new hose wagon.

The stock of the old Confederate ram "Albemarle" which has for years been on exhibition at the State museum has been carried to Charlotte and placed in the Woman's Exposition.

FINANCIAL OUTLOOK.

News and Gossip on Stocks, Cotton and Wheat.

NEW YORK, May 4.—3 p. m.—Europe seems to want our gold more than she wants our wheat. The disposition of Japan and Austria to get their gold where it is the cheapest is both natural to them and profitable to us. America produces annually more gold than is likely to be shipped in 1897. The weak point in our situation is the accumulation of woolen, cotton and silk textile fabrics and raw sugar with the expectation of a profit from the duty to be levied when the Tariff bill passes. This will delay the date at which under the operations of the new bill the monthly revenue deficiency can be covered, but it will not defeat the reviving courage and the strong determination of business men to recover under improved conditions the money losses and time wasted during the past four years.

No man, having the country's interest at heart, will hesitate to endorse any measures that legislators at Washington think necessary to harmonize sectional interests and views, provided concessions are not made at the expense of national prosperity and progress.

GOSPEL.—Madame Rumor says that a former railway magnate's heirs are steadily unloading the securities accumulated by the great railroad builder and manipulator, and it must be confessed that the price of Missouri Pacific and its associate stocks greatly supports the theory. We hear that Pacific Mill is sure to pay a dividend of 1 per cent. very soon, and likely to sell at 90.

Possibly the majority of the Senate will vote in favor of Senator Morgan's Cuban belligerency resolution, in which case there may be a sufficient doubt as to the House's treatment of the resolutions to create a small break.

The Tariff bill reported today to Senate fixes duty on hides of 14 cents per pound, as reported before, and sugar schedule as before scaled upwards on polariscope tests with additional ad valorem of 35 per cent., all apparently not favorable to Sugar Company. The apparent differential in favor refined is .0116 cents per pound. Experts say their protection is a little better than the Wilson tariff and

Celebrated for its great leavening strength and healthfulness. Assures the good against alum and all forms of adulteration common to the cheap brands. ROYAL BAKING POWDER CO., NEW YORK.

much better than the Dingley bill as reported from the House.

STOCKS.—The stock market opened firm with the attention of traders almost entirely concentrated on Sugar and Gas, both of which made good advance and held their position well. The granger stocks were also well supported by Street sentiment and fair buying. Other things were mostly neglected, and Missouri Pacific actually weak, breaking its low record for years.

Rock Island earnings for April, as estimated, shows decrease of \$46,357. Dividend is expected on Chicago Gas, at postponed meeting, and appears to have been named. American Spirits Company are attracting attention to their advanced prices for goods and as they say the company ought to show profits, especially if they can sell the goods.

Iron interests are beginning to turn their attention to an export basis, and any progress in that direction is extremely significant. Stocks are doing well and tone of market daily improving.

COTTON.—Liverpool sales reported but 8,099 bales, and their market was lower, as was this. The disposition to speculate in the nearby months is less marked and most good judges are beginning to doubt the wisdom of getting long on cotton while cotton cloth is selling at 23-16 cents per pound.

The Houston, Texas, "Daily Post" prints about 350 reports from all parts of Texas, showing an average increase of average of 8 per cent. increasing total acreage of the State from 6,700,000 acres to 7,200,000 acres. If this acreage should average 200 pounds per acre, or say 150 per cent. of a full average, there would follow an average of 2,250,000 bales for Texas, against 1,900,000 bales last year and 3,114,000 bales in 1894 and 2,822,000 bales in 1891-2, when the crop of the United States reached 9,639,000 bales. We have been advising sale of cotton around 71 cents a pound, and we think it equally good sale at present decline.

WHEAT.—The reports of English crop are not flattering and the French expect less than 1894. California and the middle Eastern States prospects are not improved, while in the Northwest district, especially lower Manitoba and extreme Northern Pacific sections, are reported likely to show a large acreage.

Prime in "Daily Stockholder" says: "Weather has been bad, but farmers expect twice as good a crop from Spring as from Fall seeding. Report fair progress, and think average crops are before us."

Wheat should be bought only on a crop break as the Chicago and St. Louis bear operators are doubtless playing for declines. Wheat is stable, however, to sharp runs on war, and a better foreign demand might spring up at any moment.

Dry, Jones & Co. figure stocks, quantity ahead and in farmers' hands at 67-40,000 bushels, against a similar estimate year ago of 116,300,000 bushels.

Yours truly, MACY & PRINGLETON.
