THERE IS DANGER IN IT.

The Debs movement is looked no on by most people as something of a joke, but there is, in our opinion, a serious aspect of the subject. which may finally command the attention of the general government. Debs proposes to organize branches in various States of the Union, and to have a national council, which will meet each year in Chicago. The plan is further outlined by him as follows:

Recruting headquarters will be established at each local branch. The rules governing admission will be strict enough to bar out objection able characters, and at the same time liberal enough to admit all honest and industrious workingmen. In order to have a source of revenue as early as possible, the very first move will be to establish tomporary recruiting stations both in Chicago and elsewhere. This will be done immediately after the present convention adjourns, and some of the plans are being worked out now as rapidly as possible.

One remedy which can be u with great frequency and often with great benefit in household medicine is that which is popularly known as the sweet spirit of niter, which is employed. as many persons know, for the purpose of allaying moderate fever and nervous excitement, particularly when these symptoms arise in young children. It is given to a child in a dose of from ten to twenty drops, generally in cold water, and this may be repeated every two hours during the night. As a rule it tends to increase the activity of the kidneys and also to the activity of the skin, so that as the temperature falls the child frequently breaks out into a slight perspiration. These doses, or ones which are slightly larger, are entirely harmless in practically every disease which will be met with, and it is only when yery large desir, amounting to several teaspoonfuls, are given at once that sweet spirit of niter has the power of doing great

It is a curious fact that if given in very cold water, and when the patient is lightly covered, sweet spirit of niter will act chiefly on the kidneys, whereas if it is given in a hot lemonade to which has been added a little whisky or brandy, and if at the same time the patient is warmly covered in bed, it will very frequently produce a profuse sweat and so will tend to break up a forming cold. This drug should be bought in small quantities and a fresh supply obtained each time it is needed .- The Chautauquan.

Remarkable Telegraphic Fest.

"I think the public has not thoroughly appreciated the fact that the telegraphic work done in connection with the international chess contest two weeks ago between members of Congress and the Brit ish parliament was in a number of respects the most remarkable feat of skill ever accomplished in the history of telegraphing," said Mr. M. For Three Years He Suffered — Could Hardly Breathe at Night — One Nostril Closed for Ten Years.

Mr. A. M. Ramsey, of De Leon, Texas, was a sufferer from Catarrh in its worst form. Truly, his description of his sufferings seem little short of marvelous. Instead of seeking his couch, glad for the night's coming, he went to it with terror, realizing that another long, weary, wakeful night and a struggle to breathe was before him.
