The Commonwealth is quite right in advocating the establishment of the whipping post in North Carolina. It would do more towards lessening certain crimes than all the laws on the statute books.

Governor Russell's position on the railroad pass matter is the weakest and most ridiculous of all his many weak gubernatorial positions. His excuses for accepting railroad favors level. while condemning others, border on the idiotic.

INDUSTRIAL DEVELOPMENT PRO-MOTION.

In the promotion of local industries in the South, the factor of la bor is a most important question to be considered. More so, when the enterprise to be promoted has for its chief object the social and material benefits of the city or town in which it is to be built.

Building factories in a city in one section of a State, may prove very different in its social results from the construction of the same class in another portion of the State, while the material results to the promoters might prove equally re munerative in both sections.

In the section where the colored race predominates, the establish ment of factories has the tendency to draw in and centralize the colored people, to the exclusion of the whites,

Such a result is quite natural, for the colored laborer is at hand, prepared to accept, at least at first, the wage which may be tendered to him or her.

Then again the colored worker can live upon whatever amount may be paid in a manner which the white laborer of the more desirable class could not do.

In the towns of the South in the thickly populated colored belts, the building of factories has resulted in this centralization of colored people, but failed in part as yet, have three and while the owners of those industries which have employed the colored laborer reap the individual benefit, their towns have not grown and developed, or received their proportionate benefits, because the colored laborer has made the in- to the owner, who rewarded Mr. Tom crease of population, to the exclu- with a silver dollar for his honesty. sion of the whites, resulting in a lower social and educational order of vice will take place at his late resisociety.

The readers of this paper will be pleas ed to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarris. Hall's Catarris Cure is the only positive cure known to the medical fraternity. Catarrh being a constitution al disease, requires a constitutional treat ment. Hall's Cutarrh Cure is taken in ternally, acting directly upon the blood and mucous surfacaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the caustitution and as misting nature in doing its work. The Southern city or town which shall try by the introduction of white labor in its manufactories to develop its resources, and build itself up, will probably come nearest to solving the question of permanent social and educational growth, at the same time advancing and plac ing its material prosperity upon solid foundations.
