CONDITIONS, NOT DEAR BREAD THE CAUSE

The reports from Europe are that the newspapers over there are publishing cartoons and articles holding Joseph Leiter, the Chicago grain merchant, responsible for the bread an electric button and completely con-

endorsed by those countries which and easy, special apparatus being de have riots and disorders among their people.

To say that one man in Chicago, can alone and unassisted produce such conditions as will cause a bread famine throughout Europe, and raise the price of wheat to the high price it is now selling at, and hold the price at the advance against the combined forces of the entire world. lice and burglar alarm service, so that Coughs and Colds, he declares that gold is too improbable and unworthy of serious consideration.

Joseph Leiter is not responsible for the famine in those European countries where riots are now taking place owing to dear bread.

The real cause is the shortage of the world's wheat crop, which shows a shortage of two hundred million bushels.

This immense shortage is in European countries, and had not the United States raised a large wheat crop, foreign countries would not have bad wheat bread at any price. The riotings in Italy cannot be

regarded as mere bread riots.

The advance in wheat to prohibcerned has not brought about these troubles and disturbances, for somebehind it all.

The hinges have evidently strip the people of not merely their come from the company scrap pile, and liberties but also of their ability to the same source. Some of the roofs have gain a livelihood.

Bloody conflicts have taken place in Italy when dear bread was not the excuse, but the exactions under which the people were burdened was the cause for them.

Make this condition, and it does not need high wheat to drive men awaiting him by his bedside a beautiful to deeds of violence.

Monarchial Europe is today laboring under an oppression which forces its people into acts of violence. The people can be held for a time in subjection but a spark may fall at any moment which will cause an explosion.

Dear bread may be said to be the spark, but without the conditions years?" which exist in Europe, which continually breed unrest among the people, keep men in poverty, so that him I told him that he was not good any change, be it revolution or death is welcomed, no explosion faster than I have." — Detroit Free would occur.

European courts may offer dear bread and Joseph Leiter as the cause of riots within their domains, but better it will be for them to seek the remedy within their own reach, namely, wise concessions to their subjects, in the way of relief from

present oppressive burdens. Fifty year ago a revolution awept Europe, monarchies were threat ened but escaped destruction by granting concessions to their peo-

SAFE BEHIND IRON DOORS.

How a Brooklyn Sacrament Service Is Protected From Thieves.

It is generally accepted as a fact that the most expensive and elaborate tabernacle for the services in this country is that belonging to St. Augustine's church, Brooklyn. Formed entirely of gold and silver and studded with precious stones, it would prove a rich haul for the daring but sacrilegious marauder. This fact was fully appreciated by the church authorities, who have devised a plan of protection which is as near perfect as can be. It is an electric system, unique and effective, and now when the congregation arrives the tabernacle is in full view, but as soon as the congregation is dismissed the tabernacle disappears completely, apparently without

Two great, heavy harveyized iron doors, which have been covered with gold leaf, roll forward at the press of ceal and protect the costly chancel These folding doors meet in a dome at Such an excuse will of course be the top to afford protection in that direction. The motion of the doors is slow vised for the purpose, the doors moving on heavy roller bearings. The motion is imparted to them by means of a system of gears, actuated by an electric motor installed directly beneath in the cellar. In order that no one should have access to the actuating push buttons these are placed in a regulation fire and burglar proof vault of massive construction, the combination to which is known only to the rector and his associates. All the wires leading to the motor from the source of supply are con- ages, and was absolutely cured by Dr.

One of the most important factors in maintaining health in good order is cleanliness. It is comprised in measures that tend to keep the organs clean and in proper order to perform all their ctions. The cleanliness of the skin and the air (purity of the air) that we breathe in are essential for the proper keeping of one's health. Any impurities that are taken in breathing find their way to the blood, and thus serve so many centers of disease and are the cause of any infectious diseases. Again, if the skin is not kept clean the
