own party captured by the Fill-at Baler, and Admiral Dewsy achat the other five may have been killed in the original assault upon the landing early at Raier. The identity of the memrs of the party still unaccounted for is

A telegram was sent to Admiral Dewey day asking him to inform the Navy becay saming single near the names of the men known to be in the hands of the Filipinos. It is accepted at the depart-ment that the reason he has not already urnished these names, with the excep-tion of Lieutenant Gilmore's, is that he

niral Dowey says the men are held pris mers, are supposed to be San Fernando, out there is no assurance on that point.

The Weakly Crop Bulletin

RALEIGH, May 2.—The Weekly Crop Sulictin for week ending Monday, May During the ending Monday, 1st, 1896

the progress in farm work and the th of crops was rapid and satisfactory. Only a few unfavorable reports sived from the eastern section of the State. The week spaned cloudy with showers from the 25th to 37th, which were needed, as the ground was beginning to get dry and hard. The rainfall averaged over half an fuch and proved to be beneficial everywhere, except over the coast counties, where too such rain fell last week. The ground was musty softened and placed in exceldition for plowing, while the induced vigorous and rapid growth, and will sasist materially to secure good stands of cotton and corn. In Brunswick, New Hanover, Pupils and neigh-boring counties over an inch of rain felwhich was more than needed; a local downpour occurred also in Caldwell and Catawba counties, Patterson reporting 2 85 Inches on the 26th. Some hall oc curred without doing much damage any where. The mean temperature contin-ued slightly above the normal the entire week, but the nights were rather 90c 95c \$1 10 and \$1 35 felt in the east, owing to the prevailing beneficial amount of sunshine prevailed

the latter part of the week. Plowing continued actively during the week; it is to be feared, however, that planting in many cases has been hurried without sufficiently thorough prepara

o a good stand in many counties, except n the southeastern section, and is grow ng nicely. Planting cotton is proce ing more slowly, but large areas are now ready to receive the seeds, and the bulk of the crops will be put in during the next two weeks. A little cotton is up ne extreme south. Tobacco plants eds look well, and plants already set out are making a good start. In the northwest plants are small and late, and the work is proceeding rapidly else-where. Spring oats have been sown and are growing well. Other grains continue to improve; wheat and fall Rice is coming up nicely in the north but low land and river rice lands, Cape Fear district, are still too wet to work rear district, are still too wet to work. Irish potatoes are growing rapidly; only a few reports of rotting and of poor stand have been received. Truck farms are very line. Early peas are being shipped from the extreme south, and are blooming nicely further north. Strawberries are blooming from east to west while shipment of early fruit to the north continue from the W. & W. District. entinue from the W. & W. District. Melons are coming up nicely. The pros-pects for apples and cherries seem to be especially good. Pastures look fresh and green, and clover is very fine.

CATARRE OF THE STOMACH ant, Simple But Safe and

factual Cure For It. Catarrh of the stomach has long be ed the next thing to incurable The usual symptoms are a full or bloat ing sensation after eating, accompanies with sour or watery risings, a formation of gases causing a pressing on the heart and lungs, and difficult breathing; head sches, fickle appetite, nervousness and s

general played out, lauguid feeling.

There is often a foul taste in the mouth, coated tongue and if the interior of the stemach could be seen it would show a slimy, inflamed condition.

The cure for this common and obsti nate trouble is found in a treatmen which causes the food to be readily, thoroughly digested before it has time to ferment and irritate the delicate mucous surface of the stomach. To secure prompt and healthy digestion is the one secessary thing to do and when normal digestion is secured the catarrhal condi-

tion will have disappeared.

According to Dr. Barlanson the safest and best freatment is to use after each meal a tablet, composed of Diastase, Aseptic, Pepain, a little Nux, Golden Seal and fruit acids. These tablets can now be found at all drug steres unde the name of Stuart's Dyspepsia Tablets and not being a patent medicine can be used with perfect safety and assurance that healthy appetite will follow their regular use after meals.

Mr. N. J. Booher, of 2710 Dearborn St Chicago, Ill., says: "Catarri is a local condition resulting from a neglected cold in the head, whereby the lining mem brane of the nose becomes inflamed an the poisonous discharge therefrom pass-ing backward into the throat reaches the stomach, thus producing catarrh of the stomach. Medical authorities prescribed for me for three years for catarrh of the stomach without cure, but today I as the happiest of mee after using only one box of Stuart's Dyspepsia Tablets. cannot find appropriate words to express my good feeling. I have flesh, appetite and sound rest from their use,"

Stuart's Dyspepain Tablets is the safes as well as the simplest and most conven-ient remedy for any form of indigestion catarrh of the stomach, billouaness, sou mach, heartburn and bloating after

Send for little book, mailed free, or stomach troubles, by addressing F. A. Stuart Co , Marshall, Mich. The tablets can be found at all drug stores.
