Entered at the Post Office, New Be N. C., as second class matter.

Oficial Paper of New Bern and Craven County.

New Bern, N. C., Doc. 6, 1899.

LIMITS TO INDIVIDUAL PRESENCE. On hardly any one subject are the so many erroneous conceptions, as that

of personal freedom. The foreigner coming to the shores of America has wonderful Ideas of personal liberty, and his abuse of laws of order and decency, followed by arrest, provokes curses and threats against the autherities who have checked his notions of "freedom."

Abuse and criticism of those in au thority in the government, is one of the strange enjoyments of a certain class inthis country, who individually, will often boast that, "I am just as good as the Governor of my State, or the President of the United States," and this personal self-complacency will be the basis for abuse of Governor or Presi-

dent. An employe in one of the Governme Departments in Washington was discharged a few days ago for unreasonable and public criticism of the official con duct of a government official higher in

authority. The deserved discharge of this may followed, and immediately there came the cry that there was no freedom in the government, every employe was a slave.

and no man could express himself. In private business, how long will an employer keep a clerk who gives away his employer's affairs, or secretly abuses his employer's good name and credit? Another act of "freedom," which is the property of the yellow journals, is the

public insight into private affairs. The question of famt'y name or honor, the exposure of private household matters, is assumed by these yellow journals as a right granted by the "freedom" which is supposed to be peculiarly

American. The consideration of personal exemption, or the purpose of morality, is not thought of nor prevents the attack under cover of the "freedom of the press," which panders to the depraved

class of humanity. It is this reckless disregard as to what constitutes "freedom" in the nation and among individuals, that provokes the younger generation to lack in respect to their parents and those in authority in city, State and Government.

"Freedom of speech" means too often the privilege of personal abuse of those to whem respect and honor is rightfully due, and not the criticism of a just and well balanced mind.

That there is a limit to individue freedom, which seeks to pa'l down personal character or bonor, or threate the cheriahed institutions of a govern ment, is seen when those who atte these abuses are arrested in their attempts to wreck, and punishment is mated out

And well it is that such curbs a o given to this class of freedom scekars, perhaps if more freely given there might be better chances for the uptuilding of a truer and better personal liberty.

that John, the driver, had purchased a fond of pumpkins, which the mative men and women from the Manoe valley had brought to the wagon to barter.

At first I was pleased, but when I found that John had traded away about 20 pounds of preservative, consisting of atom and arsenic, which had mistaken for salt, I was filled with dismay! We know not the villages. had mistaken for salt, I was filled with dismay! We knew not the villages whence the natives had come, nor could we explain the mistake, as we were ignorant of their language; and before my scared mental vision rose piles of dead Mashonas, pestilence and war on the whites—provided there remained enough live Mashonas to make to

It.

Hence it was that before daylight the next morning we left for the fort. We made no mention of the matter to any one, but a year later, when visiting the Mazoe valler. I inquired of the natives if there had been any disease among them about the time when the while men arrived in the country. They said there had been an epidemic of stomach aches, but, fortunately, no one had died from it; so my conscience was profoundly relieved.—"On the was profoundly relieved.—"On the South African Frontier."

The rough outlines of cheesemaking are probably familiar to every one remet. The curd is then broken up and the liquid whey drawn off; the breaking up of the curd, its straining and the subjection of it to pressure are processes repeated several times until eventually the curd has become of the pressure are processery consistency and solidity. eventually the curd has become of the necessary consistency and solidity. It is then set aside, is untilly for some considerable time, to ripen, and during this time great changes are subtly taking place in its substance, so that the curd, which at first was an uneatable solid, becomes gradually transformed into a palatable cheese.

Suitable external conditions, chief among which is a proper temperature, are, of course, necessary to bring this ripening of the curd to a successful is one, but the real reason of the trans-

ripening of the curd to a successful la-sue, but the real reason of the trans-formation is the presence of myriads of bacteria, which and in the curd a futurious dwelling place, where they can live and multiply. That is so liv-ing they must abstract foodstuffs from the curd around and give out in turn new substances is marely the natural course of their life, but it makes all the difference between curd and cheese.—Good Words.
