HEALTHY OLD AGE.

Lanun, BENTON Co. ARE., Aug. 6. I am 49 years old and have ben suffering with Change of Life I had flooding spells so bad that none thought I could live. If nusbang got me Wine of Cardul and its sawd my life. I am like another person since taking it.

MRS. E. B. TOWNSEND.

Wine Gardui

It is the devout wish of nearly all people to live to a ripe old age.

None of us want to die young. This universal desire can be realized if care be taken of the health in carly and middle life. A little precaution then care be taken of the health in early and middle life. A little precaution then will add many years to our existence. Death can be kept away a long time. Happy, healthy old age will be the lot of the woman who promptly corrects the aiments which afflict her sex. In youth, Wine of Cardui will take the female child safely over the dividing line between girlhood and womanhood. As a wife she needs it to help her through the trials of pregnancy and childbirth with as little discomfort as possible. At the Change of Life it will help her over the dangerous place that appears in her pathway between 40 and 50. Then will come many years of truly blissful existence. She will grow old slowly and gracefully. To the last she will preserve that charm and beauty which are always characteristic of perfectly healthy grandmothers. It is for women alone to decide whether they will be healthy or sick. The remedy for their bickmessive on Chaltaneous. Team

OLD TIME SHOE BUCKLES.

An Eighteenth Century Crase Which Was Pleturesque and Costly.
Once on a tame your shee was nothing without the buckle. Indeed it was a case of the "tail wagging the dog," for the buckle was the attraction and the shoe but the accompanionent. Be it observed that at first, however, it was not the size fant the costiness of the buckle which was conspicuous. Thus among coyalties, people of high rank and those who were the glass of fashion and the mold of form at court were diamonds. Needless to say that then, as now, those who desired to indicate them were paste backles, happy perhaps in that self com-Was Pleturesque and Costly. buckles, happy perhaps in that self com-placency which imagines notedy else

shrewd enough to estimate possibilities. In 1720 a leader of fushion would wear a full flowing curled wig reaching in ringlets half way down back and arms, a laced cont cut straight, with buttons put on in every possible place—thereby, by the way, affording a remarkable simi-larity to the "pearlies" of the popular and up to date costernouger- and square toed, black shoes, with an enormous flap on the instep, high beels and on the flap a small but Lrillian Jackle. Next to the buckle of brilliants came that of gold. Rich landowners and equally rich merchants, man whose reputation for being "warm"—or, in the then recent Aisatian fushionable slang, "rainocerbal," a quite obsolete synonym for moneyed-wor-gold buckles larger than the diamone ges, but still small in proportion to the

Your thriving shopkeepers were buckles of silver and your opulent farmers those of shining steel, and the poorer classes had backles of bease or from but of some material every one wore buckles on the shoes. Indeed so wide reaching was the depreciation in backle makers' work when, at the epoch of the French revo-lution, people in general followed "Ro-land the Just's" example and took to shoe ribbons that the buckle makers ne-tually, in their desperation, petitioned George III and parliament that shoe ribbons should be forbidden under penalties, clamoring for a cenewal of the smarptuary laws of Plantagenet and Tudor, with an apparent hacklift to read the signs of the tone. A spasmodic attempt was made by the princes and their entourage buckles as or bentationally as possible, but ribbons, decidedly for more unpletue-esque, though much more practical, carried the day - the attenual's Magazine.

She Knew Her Custness. As the South Side "L" train reached Twelfth street the other evening it was bounded by a curious feminine figure, clad in shaleby attire. As is the custom with o many women, she backed up against the door, her bright eyes in the purch-mentlike skin scanning the passengers. At the next station a man left the train and his seat was quietly taken by some one standing near. The old woman best tated a moment, then bent over the wom ma'am, will you tell me where yer goin

HIS VISIT TO VESUVIUS.

And What he Thought as He Gased late the Flory Fif.

An American who detests dightseeing upon principle lonfed for six works at Sorresto without stiving in the direction of places most to velers would have thought it celling in to omit. His only dread was the cross questioning of kind friends when he got home. To energe that he had difficulties and was from all those exclusively shots away from all those celchrated spols of interest would bring down no end of seore and denunciation upon him. But cient unto the day is the evil thereof, and the American resolved to trust to inspiration to get him out of such possible scrapes. The first person be met after leaving Sorreuto was an American woman on the train, and the first thing she wented to know was if

he had climbed Vesuvius.
"I did." said the American without a quiver.
"Oh, tell me all about it!" cried the woman. "How interesting it must have been! My husband never would

iet me go up, but I'd just love to bear your experience." The American, having beard the whole story many, many times, plung-ed into it with much detail. He described the long drive from Naples to the foot of the mountain and the steep ness of the inclined rallway and the way the women of the party squealed and all the rest of it. From time to time the woman interrupted with some know his lines that never once did she catch him napping. At last, after a realistic account of bow, after leaving the train he had blunged his way on foot through the hot, powdery lava to the crater's very edge, the American

paused for breath. "And what." asked the woman were your sensations as you gazed down into that flery pit?"
"Madam," said the American, "l thought of the fate that awaited all

DANGEROUS MAN EATERS. The African Crocodile Is a Swift,

"The most dangerous foes we have to meet on the Kongo," says Stanley, "are the crocodile, the hippopotamus and the buffalo. On my last visit to the Koago three of my men were killed by crocodiles, one by a hippopotamus and one by a buffalo. There are herds of hippopotamuses along the Kongo and its tributaries and thousands of crocodiles. The latter are the worst foes, be cause they are so silent and so swift, You see a man bathing in the river He is standing near the shore, laughing at you perhaps, laughing in the keen enjoyment of his bath. Suddenly he falls over, and you see him no more A crocodile has approached unseen, has struck him a blow with its tall and

seized bim fustantly. "Or it may be that the man is swimming. He is totally unconscious of danger. There is nothing to stir a tremor of apprehension, but there in deep water, under the shadow of that rock or hidden beneath the shelter of the trees yonder, is a huge crocodile, It has spotted the swimmer and is watching its opportunity. The swimmer approaches. He is within striking distance. Stenithlly, sliently, unperceived, the creature makes for its prey. The man knows nothing until he is seized by the leg and dragged under. and he knows no more. A bubble or two indicate the place where he has gone down, and that is all."

One of Unrrison's Jokes. "Benjamin Harrison once played a mean trick on me at Miami university," sald William -P. Fishback, "We boarded with a widow in Oxford, and there came to be a discontent among the boys about the food not being sufficiently generous in supply. A meeting was held in Harrison's room to arrange formal protest. Lots were east as to who should present the case at the breakfast table. The ballot box was stuffed, and I was elected. I spoke at the breakfast table and stated that the boys objected to paying so much for so cant a menu. I expected to be sup-

ported by the others.
"Benjamin Harrison spoke and, to my dismay, said: 'We don't know how Mr. Fishback has been living at home -he may have been a pampered son of luxury-but, as for the rest of us, we have no complaint to make."

"And that disposition of fun and bu-nor never left Benjamin Harrison."

Warmth of Birds' Blood.

The blood of birds offers some data
for thought not found in the blood of any other class of animals. The blood of any other class of animals. The blood corpuscies are shaped differently, be-ing oval fustend of round. But this is not the difference to which I refer. Birds' blood is several degrees warmer than that of other animals. To man such a temperature of the blood as such a temperature of the blood an birds possess would be a fever. This high temperature causes molecular changes in the tissues and brain to take place more rapidly, which would cause the consumption of more food and brain activity would be more intense, so that for the same amount of work is smaller brain would inter all the requirements, which at a lower temperature would require one of greater size.—Phrenological Journal.
