MUNICIPAL OWNERSHIP OF MUNICIPAL

The day when the municipal ownership of such properties as water, light and sewerage is questioded as not being the best thing for the citizens of a community is fast passing.

re may be the question of munici-nopoly, in this municipal ownership, but it is not the monopoly of an individual, a firm or a corporation, for municipal ownership of water, light and sewersge means the joint interest of every taxpayer of the community in

This municipal ownership means a saving to the taxpayer, for the matter of improper management by the authorities is one which need not be considered.

Besides the saving in money to the tax-payer, this municipal ownership gives the authorities the power to maintain practically a perfect state of local sanitation, and if there is anything desirable in a community it is a condition of healthfulness.

In connection with this local municipal ownership, the following interview published in a Chicago newspaper, with an official of Glasgow, Scotland, is of special interest:

"Municipal ownership in Glasgow has been tried and in no sense found wanting. It has increased our water and gas facilities, cheapened the price and helped to inspire in the community civic pride and virture. Municipal ownership formishes us gas at 43 or 43 cents a thousand four. It silves us water, at the rate of I es us water at the rate of 1 penny in the pound, whereas formerly the rate was about I shilling in the

"Our council elects our lord provost "Our council elects our lord provost, and it is elected by popular vote. In it sits secretaries of labor unions and owners of shipyards. It represents all classes It is absolutely clean—we have no jobs. The success of municipal ownership in Glasgow is dependent upon the interest. of everybody in our city. And that ownership rests really upon the intelli-gence and honesty of the great class of respectable workingmen. They demand

respectable workingmen. They demand clean government, and they get it.

Municipal ownership is made possible to every borough and district in Great Britain by a law of parliament. That law, however, does not allow a district or a town to play the dog in the manger. If the people want municipal or district ownership, they can have it; but if they do not wish to undertake it, they cannot then har private companies from performing such functions."

And it is this kind of municipal own-

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now knows to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Polians for any case that it falls to cure. Sund for list of Testimonials.

TRAINING OF ANIMALS.

Only Accomplished, it is said, by the Use of the Whip.

The popular theory that animals can be taught tricks by firmness and kind-ness is a grim error, according to a vet-eran circus man who has sent forth the dictum that no animal was ever trained to do anything unnatural ex-cept by punishment. If it knows hun-ger or pain will follow disobedience, it will obey.

will oney.
It takes the whip to break the colt to It takes the whip to break the colt to harness or saddle, but the end justifies the means, and the animal's intelligence when once it has learned its lesson does away with further use of the whip. But if a horse is taught tricks, such as one sees in a circus, the constant use of the whip is necessary, and the little pat on the neck the trainer gives the animal in public is not bestowed in private. There is never any stowed in private. There is never any let up in their training.

Trained dogs always appeal to wom-en and children, for the little animals appear to thoroughly enjoy their work. But the barking and frisking are only But the barking and frisking are only the natural joy of the poor beaas at being let out of the cramped quarters where they stay when they are not in the ring. Moreover, they know the trainer does not whip them in public. There is scarcedy a trick a trained dog does that he likes or that he will do at corder unless completed. Willis Cobb reputation, and when he was middle aged he abundoued his profession be-cause, he said, he had not the heart to go on making a living by whipping dogs.—Cleveland World.

There is a great deal of ignorance as to what "alleneing a gun" means. A gun is silenced when the gunners are disabled or driven back and the gun or gun carringe damaged. It is a common amongh phenomenon for weapons which have thus been silenced to reopen fire after repairs have been made, the gunners railied or a fresh gun crew obtained. It is a rare thing for a gun to be so damaged by hostile fire that it cannot be contrad and brought into action again.
