WINE OF CARDUL

Woman's_ Crowning Virtue.

For years I suffered terrible pains every month and my doctor told me I could not be cared except by an operation. I felt I could not attent to that and was so despondent I had given up all hopes of a care. My husband insisted on my terring Wise of Cardini and at last thank God I did try it. Last month I did not have a pain, and did all my work, which I had not done in seven years.

Modesty is the crowning virtue of American women. It is the trait that all mankind admires. A modest woman is the most pleasing of all created things. Because of this becoming virtue thousands of women prefer to suffer untold miseries rather than confide their troubles to a physician, and to even think of submitting to an examination is revolting. They can't get their own consent to an operation. Wine of Cardul permits sensitive women to retain their modesty. With it they can cure "temale troubles" in the quiet of their own rooms. If special treatment is required they can write to the Advisory Department of the Chattanooga Medicine Co., and their letters will be promptly answered by women trained in the cure of womanly weaknesses, and irregularities. There should be no besitation, before here, it is a classification. Delayed treatment means a chronic condition. The longer postponed the harder to cure.
