MAY PROVE MORE THAN A JOKE.

Now that the first burst of public expression, by the press, politicians and leading public men, regarding the Presidential candidacy of Admiral Dewey has passed over, a quieter second view of Admiral Dewey's position may be in

The first mention of this new claimsnt for Presidential recognition, has been received generally as a huge joke, and

The press of both political parties has shown how impossible it would be for the Admiral to get the nomination from Democrats or Republicans.

The politicians have conclusively expressed themselves on the subject, and pointed out that Mr. Dewey has no "machine" behind him to carry on his candidacy, first in securing for him the necessary nomination, and secondly, the equally important matter of presenting his claims before the voters, in order to get votes.

Admiral Dowey, himself, after his abrupt public presentation of his own candidacy, now refuses to talk for the pullic, but none the less insists that he is a Presidential candidate, and will soon announce his position as such a candidate, and explain his views, so that the public may know how he stands on the great questions of the day in this coun-

That Mr. Dewey is to be seriously considered, from a political standpoint there can be no question, that is, he pre-sents himself to the public, and leaves the rest to chance whether he shall be accepted or not

That he will supplant either Bryan or McKinley, in Democratic or Republican convention, is not the question, for such a probability is most remote.

But the joke of Admiral Dowey's candidacy is passed, and he stands as an actual Presidential candidate, and in this age when the seemingly impossible often takes place, George Dewey, the Manila hero might become a political here on some line of Independent political preferment at the hands of the American voter, and prove that the seeming jest of his Presidential candidacy was a serious matter to these who held his candidacy to be a trifling matter.

by local 'applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafuess, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eastachian Tube. When this tabs is inflamed you have a rumbling sound or imported hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the nuncous surfaces. In the cities, at the botels and restaurants where there are French or Swiss cooks, the "chupe" is savory and palatable, but the farther you go from the centers of civilization the worse it gets. One ents it at first under protest, then from necessity and only to escape starvation, but finally the stomach rebels, and you limit your diet to boiled eggs and fruit, which are usually to be obtained, but the experienced traveler always takes canned mest and bread with him.—Sucre (Bolivia) Letter to Chicago Record.

## STREET PARADE FLOATS.

Many Difficult Problems to Be Met In Their Construction.

"The making of decorative street floats is a difficult trade," said a New Orieans seemle artist who has had pleaty of experience in the line he mentioned. "There are so many things to be considered. For instance, a float must look well both near and far. It must be able to stand a dash of rain. It must be light enough to go over any kind of street and solid enough to resist a gust of wind, and, most important of all. It must be so constructed that it will appear all right to folks in that it will appear all right to folks it upper windows. "Some years ago a young designed

from the north made several smal models for tableau cars that charmed everybody who looked at them. They

everybody who looked at them. They were certainly very beautiful and novel, but when I was called in as an expert I said at once that they wouldn't do. They were designed to be viewed from the benquette only, and from a second story window overy particle of effect would have been lost. Moreover, a lot of hidden mechanism was certain to be discovered at any elevation above 15 fact.

"The young artist frankly admitted I was right and abandoned the job. He said it involved entirely too many optical problems to suit him. When I make my drawings for a ficul, I calculate on a visual sweep of 30 degrees. That goes from the level of children on the pavement to people looking almost straight down from the upper floors of tail buildings. Unless such a precaution is taken the car is certain to be a failure."—New Orieans Times-Democrat.

Every little while you read that a man 96 years old and still hale and hearty has smoked all his life, but it

is nevertheless a fact that smoking is very injurious. Men should be ashamed that they are unable to quit the habit. This is not written by a man who has no dealre to smoke, but by a man who amokes a great deal, has tried several times to quit and couldn't do it.

When you find a boy who is pale and sick from his first smoke, remember that his father and his grandfather are to binne. It will take thousands of years to referm the world if we begin now.
