## CHINESE THREATEN.

In Case Allies Advance The Ministers Will Be Murdered.

Japanese Advance Line Repeated Troops Ordered Up. Russia Is Backward. Conger Message Genuine.

Special to Journal.  
WASHINGTON, August 3.—The movement of the allies toward Peking began last Sunday from Tien Tsin. The Russia commander made a show of reluctance to join in the advance but part of the Russian troops had already been thrown forward.

The Japanese troops in the advance struck a Chinese village and arsenal. The Chinese opened fire from loop holes and wounded thirty Japanese. The latter then retired from their position and fresh forces were pushed up.

Sheng, the Chinese director of railroads, declares officially that if the allies continue to march on Peking, all the ministers will be killed. The viceroy of Nankin makes the same declaration.

The Chinese viceroys declare that no more messages will be sent to the ministers because the allies are advancing on Peking.

Two Chinese officials who have shown friendship for foreigners have been headed.

The State Department has a dispatch from Consul Fowler at Chefoo which says that the cipher message from Minister Fowler at Peking was genuine and was dated July 30th.

WASHINGTON, Aug. 2.—It would not be surprising to well-informed military experts here should the Chinese army which proposes to dispute the advance of the allied troops upon Peking be caught between two fires, for, coincident with the advance from Tientsin, a second column, composed of Japanese troops, has left Shan Hai Kwan.

Shan Hai Kwan is on the same parallel of latitude as Peking. There is a good road leading to Peking from that place and the column following it could cooperate with the one leaving Tientsin.

It is expected by officials here that the Chinese troops will make an effort to stop the Tientsin forces a short distance from that city. Failing in this it is believed the Chinese will fall back behind the walls of Peking.

The disposition in official circles seems to believe that another defeat to the Chinese forces outside of Tientsin will mean the collapse of organized opposition.

## SHAH'S NARROW ESCAPE.

Attempt On His Life In The Bois de Boulogne. Saved By His Grand Vizier.

PARIS, August 2.—Following close upon the assassination of King Humbert at Monza and the attempted shooting of King Alexander at Belgrade, a determined attempt was made here this morning to kill the Shah of Persia, as he was leaving the Palace of the Soverieigs, where he is the guest of the French nation.

A letter dated from Naples was received by the Shah in the mail this morning, warning him that his life was in danger. This letter was posted in Paris. It said:

"To-day you shall meet the same fate as Humbert."

The letter was signed by an Italian, who gave his address.

Disregarding the letter, the Shah left the Palace shortly after 9 o'clock in the morning on a visit to the pottery works at Sevres. The gates on the Avenue Malakoff side were opened wide, and while the guard turned out to present arms the royal landau started at a walk in the middle of the avenue and turned to the left into the Avenue du Bois de Boulogne. Beside the Shah sat his Grand Vizier, Amir Sultan, and facing the monarch were Dr. Adcock, his physician, and General Parent of the French army.

Bicycle policemen and detectives in plain clothes, also riding on wheels, preceded and surrounded the monarch's carriage. It proceeded only about 30 yards towards the Avenue du Bois de Boulogne, when a young man, having the dress and appearance of a workman, pushed the police aside and sprang upon the footboard of the carriage.

He held a drawn revolver and quickly pointed it at the Shah, almost touching the monarch's breast with the muzzle. For some reason he hesitated a moment before pressing the trigger. Instinctively the Shah bent slightly to the left, putting out his right hand at the same time to ward off his assailant.

The Grand Vizier, a man of great strength, promptly seized the would-be assassin's wrist and gripped so hard that the man dropped the weapon, which fell on the carpet at the bottom of the carriage. At the same instant a detective in a speckled uniform seized the man around the waist and threw him to the ground.

"I'd like to have a photograph of that man," nonchalantly exclaimed the Shah. Then addressing a few words in his native tongue to his companions in the carriage, he told the coachman to drive on.

The would-be assassin was dragged off to a police station. All he would say when questioned there to his reason was this:

"I did what I wished to do."

He refused to tell his name. The would-be murderer speaks in the strong Southern accent, and may prove to be an Italian, though a handkerchief found on him bears the mark of the One-hundred-and-eightieth French Regiment of the line, now stationed at Bergerac.

Paris has received the news of the attempt with but one sentiment—that of indignation. All join to condemn this outrage upon the guest of the nation. As a result of it the Shah will hereafter be surrounded by a guard wherever he goes. Extra precautions will also be taken to protect President Loubet.

# Baking Powder Economy

The manufacturers of Royal Baking Powder have always declined to produce a cheap baking powder at the sacrifice of quality.

The Royal is made from the most highly refined and wholesome ingredients, and is the embodiment of all the excellence possible to be attained in the highest class baking powder.

Royal Baking Powder costs only a fair price, and is cheaper at its price than any similar article.

Samples of mixtures made in imitation of baking powders, but containing alum, are frequently distributed from door to door, or given away in grocery stores. Such mixtures are dangerous to use in food, and in many cities their sale is prohibited by law. Alum is a corrosive poison, and all physicians condemn baking powders containing it.

## American Coal Export.

LONDON, August 2.—Much attention is being given in manufacturing circles to the report of the British Consul at Philadelphia, stating that the United States had become large exporters of coal to Europe, Germany, Italy and Austria using it in preference to the English coal.

It is his opinion that its introduction into England itself is threatened.
