BURIED AT SEA.

The Dead At Galveston Carried Into The Gulf And Sunk.

Means Used to Avoid a Pestilence Water Is Scarce. Government Lends Aid. Martial Law May Be Required.

Special to Journal. Houston, Texas, September 11—Communication by wire is established with Galveston. The city is under strict law and guards now patrol the entire city. Force is employed to compel burial squads to take up the dead bodies and load them on drays to be hauled to where they can be placed on barges.

The barges are then attached to tug and are towed far out into the gulf where the bodies are weighted and sunk. This is a heart rending act to the survivors but is imperative. The Mayor of Galveston is taking steps to protect the living from the after effects of the disaster which a pestilence would expose the thirty-five thousand survivors of the great disaster.

Hundreds of corpses are found drifting on the tide. Many of the dead were buried in the moonlight without semblance of religious ceremony or prayer. The work is done at times at the point of the bayonet.

The heat is great. No water is to be had in Galveston save that which is brought by boats, the cisterns and tanks being all swept away or filled with salt water from the sea. No meat or vegetables are available yet, the people living on canned goods that escaped spoiling. The government has sent thirty-five thousand rations to be distributed among the needy. The War Department sends 10,000 tents for immediate use for the sufferers. An order has been issued granting the request. The tents will be sent from San Antonio and Jefferson Barracks, Missouri.

It is reported that all of Battery E. First Artillery except 15 men drowned. This is an error. None of the soldiers was lost.

It is expected that martial law will be declared in the city and island. It will take a week to count the dead and the missing and to get anything near an idea of the loss. It is safe to assume that one half of the property of the city is wiped out, and that one half of the buildings escaped injury. There is hardly a habitable dry house in the city. The whole of the business front for three blocks from the gulf was stripped of every vestige of habitation, every structure having been either carried out to sea or its ruins piled far into the town, the largest structures, supposed to be the most substantially built, suffered the worst.

The Result in Maine.

PORTLAND, Me., Sept. 10.—The Republican voters elected their State ticket today by a plurality over the Democratic candidates of over 33,000. The vote was almost as large as four years ago, and the returns up to 11:30 P. M. compared with 1896, showed Republican losses of about 10 per cent. or a Democratic gain of about 18 per cent.

England's Sympathy

LONDON, September 11.—All the morning papers contained editorials expressing sympathy with the United States in the Galveston disaster.

You can spell it cough, cough, cough, cough, cough or cough, but the only harmless remedy that quickly cures it is One Minute Cough Cure. F. S. Duffy.

THE MARKETS.

EMPRESS IS TAKEN.

Said to Be By Russians. Result of Failure to Surround Peking. France to Withdraw.

Special to Journal. Washington, September 11—It is announced that the Empress Dowager of China has been captured by Russian forces at Jehol.

It is discovered that as the allies entered Peking on the east side of the city the Imperial party left by the west gate on August 14th and that if the Russians had kept their agreement to surround that side of Peking all the party would have been captured.

Four thousand of the allies have gone to Pao Ting Fu to destroy it. Five hundred of the force are said to be Americans.

Li Hung Chang has issued a proclamation to the Boxers telling them to go home, else he will behead them. France announces that her troops will be withdrawn from Peking to Tien Tsin.

Explorers Are Eaten.

Special to Journal. Washington, September 11—It is reported that cannibals killed and ate the members of a party of explorers sent by Mr. Wells from Mexico to explore the Tortugas Islands, Gulf of California.

WILL COME AWAY.

American Troops Likely to Hasten From China.

WASHINGTON, Sept. 10.—The developments of the day in the Chinese situation point to a speedy withdrawal of the United States troops from China.

General Chaffee has aided the weight of his opinion to that already entertained by many officials here. It is significant that the General's statement on this point was given publicly by the Administration.

No confirmation is at hand here of a report that Great Britain and Germany have joined in an agreement to remain together in Peking regardless of the attitude of the other powers. Should this be true, the fact doubtless would hasten the rearward movement of the American troops, for there is a firm determination to avoid becoming involved in any clash among the powers, such as might reasonably be expected to follow the execution of this reported British-German program.

The Crop Report.

RALEIGH, Sept. 11.—The crop and weather report for this date issued today, for the week ended last night, by the government, says all the reports of correspondents were unfavorable. There was almost an entire absence of rain during the week, and, although the nights have become somewhat cooler, the days have been cloudless and the sun bright and hot; the maximum temperatures rose above 90° during the last few days, and the mean for the week was over 8° above normal. These conditions have necessarily caused a further deterioration in such crops as peanuts, sweet potatoes, field peas, and some late corn, which were expected to yield fairly good crops under favorable circumstances. The saving of fodder is nearly over, and the yield is of poor quality and short. Fall plowing has again ceased, and preparations for planting winter wheat, oats, and rye are very backward. A large number of correspondents report that springs, small streams and wells have dried up, and in some instances stock is suffering for water. The consumption of water in some towns has been curtailed by order.

Cotton is now from one-half to two-thirds open, and is being picked as rapidly as the supply of labor will permit; in many sections cotton is open from top to bottom, and elsewhere it is opening so fast that fields will be picked clean nearly a month earlier than usual. The condition of corn can not change materially now; the crop is very poor; the weather was favorable for saving fodder. Cutting and curing tobacco is approaching completion. Sweet potatoes, peanuts, peas and turnips will all be short.

Wheeler is Retired.

WASHINGTON, Sept. 10.—A formal order was issued by the War Department announcing the retirement of Brigadier-General Joseph Wheeler, who today reached the age limit of sixty-four years. General Wade, commanding the Department of Dakota, was telegraphed to take charge of the affairs of the Department of Lakes until the department commander arrived.

Weather Conditions.

WASHINGTON, D. C., September 11.—Fair Wednesday, variable winds. Weather Conditions—The storm is central over Iowa this morning apparently moving north-eastward toward the upper lakes accompanied by generally threatening weather and brisk to high winds.

High temperatures have again prevailed over the interior, the Middle, South Atlantic and Gulf States, with a maximum of 96 at Norfolk. A general fall in temperature of from 6 to 12 degrees has occurred over the north.

The conditions indicate fair weather during the next 24 hours with temperatures about stationary and variable winds.

DeWitt's Little Early Biscuits are prompt, reliable, pleasant, powerful purifying pills. F. S. Duffy.

RALEIGH.

Secretary Of Water A Source Of Anxiety.

Daughters of Confederacy Meeting. New State Entomologist Populists Will Vote National Republican Ticket. Ruling On Craig Law

Special to Journal. Raleigh, Sept. 11.—The State convention of Daughters of the Confederacy meets here October 10th and 11th. Miss Alida Rodman of Washington is president.

The October Bulletin of the State agricultural department will be devoted to the game, birds, etc., and the game law of North Carolina. It will contain all the laws as to counties, a special article on game, illustrated, and a copy of the Lacey national law for the preservation of game. T. K. Bruner is preparing the Bulletin.

J. A. Giles, the Republican nominee for Congress in this district, says he will not come down but will make the run.

Franklin Sherman of Virginia arrived today to take the position of botanist and entomologist to the State crop pest commissioner. He was elected by a committee which was appointed to make a selection and succeed Gerald McCarthy.

There are many applicants for the positions of adjutant and quartermaster general. It is learned.

A railway man who came here today from Greensboro says the water supply there is cut off, owing to the drought and wells are being used, and long disused ones repaired and cleaned. The town's electric light plant is shut down. The railway hauls water in locomotive tenders to supply its electric light plant.

It is said by some observant people that the scarcity of water in many wells and springs will continue until late in the winter, as the very sources of water appear to be dry. Never was there such a scarcity of good drinking water in North Carolina.

The Populist district convention met here this afternoon to nominate a Congressman. Some of the delegates did not desire that there should be any nomination their view being that the voters be left free to vote or not, so that if they cared to vote for a Republican Congressman they could do so. The bulk of the Populists now remaining propose to vote the Republican National ticket.

Judge Purnell rules that the Craig act which requires the domestication of foreign corporations in North Carolina which do business here is in violation of United States law. It is intended to prevent the transfer of suits from State to Federal court. The Judge says this unlawful, as a State cannot limit the jurisdiction of the Federal courts.

Wood's Seeds.

Every Farmer

should have a copy of Wood's Autumn Catalogue of SEEDS AND GRAIN For Fall planting. It tells all about GRASS & CLOVER SEEDS, Hairy, or Winter Vetch, Crimson Clover, Seed Wheat, Oats, etc.

It also gives descriptions, best methods of culture and much special and valuable information about all crops that can be grown to advantage in the Fall and early Winter. Catalogue mailed free. Write for it and prices of any seeds or food grains required.
