#### TO PREVENT CRIME AND RE-FORM CRIMINALS.

The demund for the establishment of a Reformatory for young oriminals in North Carolina, should not cease, either on the part of the press, or by th se peo ple who have the welfare of mankind, and the safety of society at heart, until such an Institution is built in this State. The matter of cost is so trifling question, when the saving from sin and degradation of the youth is to be considered, that no one can argue or urge against the expense.

The cost of saving, of reforming the youth, by the establishment of a Reformatory, is a vast saving, from only a money point of view when compared to the present method of placing youthful criminals in the penitentiary, to be associated with older criminals, and to become familiar with depravity, and thus to learn the way of becoming forever of the criminal class.

The cost to the State, to society is i letting alone, not in preventing crime and its growth, by the reformation of those in it.

The National Prison Association Con gress, which held its annual meeting in Cleveland, O, last week, had under dis cussion this subject of reforming the youth by the provision of Reformatories The General Superintendent of the Illinois State Reformatory, in a report said:

"I have no hesitation in asserting that at least 85 per cent of all young men and boys who have committed erimes, if taken charge of in time and subjected to proper treatment, will become good citizens. If the theory of those penologists physicians, and professors who believe in heredity as the direct cause of crime is true, then it cannot be done, but their theory is not FOUNDED ON FACTS It is true, unquestionably, that there are hereditary criminals, but they constitute but a small per cent of the whole num

Considering 19 per cent of the crim nal classes to be such because of heredity, and that is a liberal estimate, 90 per cent must be accounted for in some oth er way. Ninety per cent of the young convicted of crimes would not be criminals with proper surroundings, proper companions, and proper atten

This is the testimony of an expert and shows what a powerful agency for good a Reformatory, with its surroundings can be, when ninety per cent of the youth could be saved through its help! And the small percentage, ten, of the

criminal classes being criminals because of heredity, shows what opportunity there is of saving the youth and even lessen-

The performances of the Bokts, or won-der working lamas, are quite as astound-ing in their way as those of the Indian fakirs, who are Mohammedans, or of the Sanyahis of Yogis, who are Brahmans, but they are usually terrible and revolt-ing. A Theran Bokt who had wandered from the parties that and constructed as from his native land and penetrated as far as Benares gave an exhibition of his wonderful powers in one of the vast tem ples of the holy city a few years ago. He was accompanied and assisted by a mongrel crowd of half human compatriots. The exhibition promised by the wonderful magician was truly an astunnding one. He proposed, in view of all beholders, to rip up his abdomen, re-move a handful of intestines, display them to the spectators and then replace them again and heal up the wound by a few magical passes, leaving no vestige of the damage inflicted. Needless to say such exhibitions are

not everyday occurrences, and the ordi-nary globe trotter might traverse India from Cape Comorin to Nepsi and not be fortunate enough to witness so marvel ous, if revolting, a spectacle as that in When the hour of noon arrived, the

Spain, a few years ago in which one of the animals in the numblikenter was a Texas steer. A steer, he says, will nor-er attack a horse or a man on horseback. A man on foot he may kill, but a man on horseback he will not moleat. He also does not abut his eyes whoch he charges, while a bull takes his line and then shatts his ayes and charges, never deviating from the line his sight gave him before he closed his orbs. This it is that embles the toreador to step so ensi-ly out of the way, for the bull, not see-ing, makes no attempt to reach the man when he has moved from the spot he oe-cupied when the bull charged. — The only trial of the Texas steer," continued the Iowan, "was pulled off at Seville, and while they intended potting proven the first on the tak bull and you

The steer paid no attention to him, but the horse, fearful of the unknown east, would not advance. In came beast, would not advance. In came a helper with a sharp stick, and the steer, positively bellowing for joy, started, an the crowd supposed, for the horse. By him the steer went in pursuit of the big-ger game, and the belper shortly cleared

the protective fence, with ten feet to spare owing to the steer's able assistance. The representative of the Texas cattle trade went over that six foot barrier as though it was a prairie dog mound of his native plains, but the helper won out to me of the protective boxes and safety.

"The steer did his best to get at him, but finding it impossible looked about for other game with which to sport. The tone seats are ten feet above the ground and this has always been an insurmound able barrier for a buil, but they reckoned without their Texas steer when they built them, for as soon as the steer's eye lit on the throng above his head he steppe back, and the next instant he was among them. Before the people could escape he had tossed half a dozen into the ring, bu they were all rescued by the ring attendants. The stone seats cleared, the store returned to the ring, and, seeing no one else to throw down the gage of battle to, took the exact center of the ring and bel-lowed his defiance to the universe. In the meantime the management had been busy, and a soldier with a Manser rife had been summoned from a nearby bareack. With the boy sail as a cost he took steady aim, and with the ping of the bui

#### An Earthquake.

Yokohama and the peighboring Tokyo are suid to have about 50 earthquake shocks a year. Most of them are insignificant, but now and then comes one of a different sort. In 1801 the Japan Mail described the experience of a man who had witnessed the terrible earthquake at He had just finished dressing when the

first shock came. He crawled and drag-ged himself out of the house, for to walk was all but impossible. The next mo ment, so highly strung were his nerves, he burst into laughter at seeing the remarkable way in which a girl was mov ng down the garden path, stepping high in the air, as it seemed.

Looking again to his front, he saw the whole town in an instant swept away before his eyes, and out of the great cloud of dust came a screaming, gesticulating, wildly frantic crowd of men, women and wildly frantic crowd of men, women and children, rushing hither and thither, they knew not where, for refuge from the great destruction which had come upon them.

The wa-terways range in size from the Grand canal hundreds of miles in length and navigable by deep water junk, to the lit-tie "neighborhood" canal of barely sufficient width for two sampans to pass each other. They serve not only for the purposes of navigation and in place of roads for trade and commerce, but also as local fish preserves, as breeding pools for water fowl and for laundry purposes. In most of the canals there is more or less current, so they are not the meance to health that is generally supposed.— National Geographic Magazine. narticular.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers' and grandmother never thought of using anything else for Indigestion or Billousness. Doctors were scarce, and they seldom heard of Appendicitis. Nervous Prostration or Heart failure, etc. They used August Flower to clean out the system and stop fermentation of digested food, regulate the actio of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling dull an bad with besideches and other aches. The Land of the Bean.

Singularly the ordinary bean, which only the Bostonians know how to cook properly, may be cultivated with certainty of profit in only a small part of the country. For many years Monroe, Or-leans and Niagara constles, in New York leans and Ningara counties, in New York state, produced many more beans than any other similar area in the world. Their bean crop was the only one of im-portance on earth. Brockport in Mon-roe country, was the world's bean metrop-olis, and farmers near there made small fortunes out of beans.—New York Press.
