A newspaper is an educator; there are all kinds of educators, but the man who spends money judiciously and liberally is better able to impart his knowledge than the man who has little or nothing to spend.

The Sun is the highest type of a newspaper.

The Sun's Special Correspondents throughout the United States, as well as in Europe, South Africa, China, and in fact, all over the world, make it an up-to-date newspaper.

The Market reports and commercial features put the farmer, the merchant and the broker in close touch with the markets at Baltimore, Norfolk, Charleston, New York, Chicago, Philadelphia and other places which are prominent centers.

From now on the news of the world promises to be more interesting than ever before and national and political questions will arise, making probably the most eventful period in the country's history.

This, together with the corps of editors and reporters at Baltimore, Washington and New York, make The Sun invaluable to its readers.
