The Governor extends the time for the sub-commission of teachers which is examining the hundreds of school text books submitted by the various publishers to make its reports to the State text book commission. Tomorrow was the day when the report is due. The extension is to May 1. The governor said regarding the sub-commission, "This State has never had better work done or more faithful workers."

The cloud-blanket is all that has for (w) days saved this State from blighting frosts. The temperature here has for two days and nights been but little above freezing-point. So far the fruit is unhurt in this part of the State, experts say.

The farmers are well up with the work of preparation for crops but badly behind-hand as to the planting. But little cotton is yet in the ground. In ordinary years April 15 is planting time. The ground is as cold as it was in January, and much wetter.

Judge Purnell and district attorney Bernard left today for New Bern, where a term of the United States district court begins tomorrow.

ROYAL Baking Powder is indispensable to the preparation of the finest cake, hot-breads, rolls and muffins.

Housekeepers are sometimes importuned to buy other powders because they are "cheap." Housekeepers should stop and think. If such powders are lower priced, are they not inferior? Is it economy to spoil your digestion to save a few pennies?

The "Royal Baker and Pastry Cook"—containing over 800 most practical and valuable cooking receipts—free to every patron. Send postal card with your full address.

Alum is used in some baking powders and in most of the so-called phosphate powders, because it is cheap, and makes a cheaper powder. But alum is a corrosive poison which, taken in food, acts injuriously upon the stomach, liver and kidneys.
