POLITICAL AGITATION RETARDS MATERIAL PROGRESS.

Governor McSweeney of South Carolina, in asking Senators Tillman and McLaurin to reconsider their resignations, has acted for the best interests of bis State.

Political agitation would be specially unfortunate at this time for South Carolina, when the people are attempting to get up a great industrial exposition at Charleston, for the Senatorial contest would be of such a nature as to dis ract from the exposition, and work it an injury, not to mention the effect that this political agitation would have upon all visitors in the State.

Of course from a certain class, the Governor's action will receive abuse, but every South Carolinian who has any State interest or pride, will applaud the Governor's course, and uphold him in

It is this ceaseless politics, with no le up or "off years" which works such hardships to the material interests of any State.

In North Carolina, every cessation from political agitation is most noticeable in trade and business throughout the State in beneficial results, while in political years every industrial pursuit seems to languish.

South Carolina is fortunate to have Governor with strength enough to offer opposition to political agitators, and refuse to lend assistance to any cause which might attempt such agitation, at the expense of the people's material interests.

If the would be political agitators will put the same effort to further the Interests of the Charleston exposition, this exposition will prove a grand success.

Notwithstanding the interruption to the shipping caused by the storm of Sept. 8, Galveston has exported 1,231, 191 bushels more wheat this season than during the season ending July 1, 1900, says the St. Louis Republic. The total exported thus far this season has been 9,700,640, and the total exported last season was 8,480,449.

Flattery From the Mirror. Does your mirror do you justice? You may think not. Or perhaps you would like it to flatter you just a little If so, you can arrange it so the glass will reflect in a more complimentary manner than usual. If you do, you or ly have to know the milliner's oldest secret, and the thing is done.

Did you ever notice the softest drap ery of pure white hung about a mirror? That is the trick. After your mirror of faultless glass is thoroughly polished frame it in pure white gauze, with the material gathered in the center at the top and failing wavelike on either side. Then notice the effect. The true tints of the complexion will be there a little emphasized. The expression of the countenance, the light of the eye, the color of the hair, will be accurately reflected, all softened and made more harmonious than your mirror showed them before the gauze was used. You may believe that that subtle bit of white materially makes the glass tell earer the truth than It did without H.

Steamers For Elopera to Run From Chicago to South Haven.

EPECIAL FOOD FOR THE BRIDES.

Chef Will Prepare Angel Food and Sweet Wine For Lovers-One Minister and Justices of the Peace Will Be Prepared to Tie the Enota Scheme of G. P. Covey.

Next June will bring a boom in the matrimonial market if G. P. Cory has anything to say, and he thinks he has. Cory is the man who originated the St. Joseph and Benton Harbor marriage excursions. He made a veritable Gret na Green of the Michigan resorts and offered special rates to eloping couples or to any prospective bride and bride-

Now he is managing a steamboat line of his own from Chicago to South Haven, and it is his purpose to make the latter resort the most popular place for the marriage ceremony that lovelorn damsels or impressionable swains can possibly find, says the Chicago Inter Ocean. He will have two steamers. both fitted up with special reference to the matrimonial trade. Drawing rooms and bondoirs will be found snugly furnished in a style to make any young person think of home. After an hour or two spent in these luxurious cabins no young man can resist the darts of Cupid, and Mr. Cory expects to turn the tide of matrimony from St. Joe to the more northern town this summer in such crowds that he will have to hire or build more boats for the future traf-

Moreover, South Haven itself is alive to the opportunities. A minister duly qualified to tie the knot that binds has been selected to devote his time to the emergencies of the lake trippers and for a moderate fee will marry couples in five minutes by the clock, or at the rute of 12 marriages an hour. The Rev. M. I. Pox of the Methodist church said to be prepared to speak the words that unite loving bearts and willing hands, and should his duties become too arduous, as it is fully expected they will be as soon as the Core matrimonial line is known, there is a reserve force of justices of the peace and several other ministers ready to step in and belo smooth the way at the

Then the beauties of South Haven are to be expatiated upon in the printed matter that will be distributed. Its lovely walks and drives among the peach and apple orchards will be deeribed, and a special offer of wreaths of white and pink blossoms for the les is to take the place of the old and familiar orange bin

Monquitoes and sand flies are to be exterminated, and the festive ant will have his habitation ruthlessly destroyod. At loust-Mr. Cory saye so, and he is running the show. Nor is this all The food is to be carefully looked after. Brides are notoriously delicate of appenité. They enmot est porterhouse steaks and lobster salads on a honeymean triple They erave for angel food and staffed eliver. Even the pickle is believed to be more entirfying than the most tender of chicken when the little god with the silver tipped arrows is doing bustness, so Mr. Cory has engaged a special chef to look after the wants of his hurry up wedding trip-pers. The most refined taste can be catered to as well as the most robust Charlotte rusec and angelies wine will be found alongside pork chops and

"I have fitted up the steamer Petos key for my South Haven line," said Mr. Cory the other day, "and will have another one in commission in time for the June brides. I expect to best St. Joseph on the marriage game, but I am not going to cater to a cheep trade. My prices will be in accordance with the comforts I furnish. Once South Haren becomes known as the Mecca, or Gretna Green, of the lakes, I believa I will have to build a new best. Asyway, I will offer the best of everything at rates to suit the most exclusive tride that ever came on board a ship I shuff expect to see a rush for the new haven for lovera."

The horse, which has long been con-signed by pessimists to the condition of the dodo, still survives and is worth fore than ever. All the new schemes of transportation, from the locometive to the trolley car and automobile, have not appreciably affected his status. Every new business makes more business in all sorts of directions. There are a constant adjustment and readjustment going on that follow natural laws. Labor saving machinery, so called, has greatly increased the number of workers, who toll less arduously. Every valuable contribution to our industrial life works out for the good of the whole in the long run. The horse will ever remain the best servant of man in spite of new inventions.-Phila delphia Inquirer.

The Gunmaking Industry. As an illustration of the magnitude of the business involved in the purchase of the smaller powers of war material in Europe one has only to look at the number of men employed at such great plants as the Krupp of Germany, the Creusot in France and those of the Armstrongs and Vickers' Sons & Maxim of England. Krupp employs something like 25,000 men The two English firms employ collectively about 35,000 men and the Creuset plant about 19,000. No reckoning is here made of the famous Loewe works of Berila or of Italian Belgian and numerous French firms. With the exception of Krupp the above establishments ordinarily confine themselves to filling foreign orders.-Har-

Yermak, the Cossack. Russia bas been expanding, stendily and surely, ever since the days of Ivan the Terrible, when Yermak slashed and smashed his way to victory in Siberia, and ever since that day her expansion has been largely by conquest of arms. Yermak, who practically laid the foundation for aggrandizement, was a Cossack chief and was born near the banks of the Don. He invaded Siberia with 5,000 men and after several victories over the native tribes took Siber. the capital, in 1580. He had formerly been a robber, but was pardoned by Czar Ivan IV on haylng his conquests at the imperial feet. He died in 1583.

Rheumatism is due to an excess of acid in the blood. When this escapes through the porcs of the skin, as it often does, it preduces some form of skin eruption—some itching disease like Eccema or Tetter—but when these little tubes or sweat glands are suddenly closed by exposure to cold and sudden chilling of the body, then the poisons thrown off by the blood, finding no outlet, settle in membranes, muscles, tissues and nerves. These parts become greatly inflamed, feverish and hot; dagger-like, maddening pains follow are quick succession, the muscles become extremely tender, the nerves break down and the sufferer is soon reduced to a state of helplessness and misery. This acid poison penetrates the joints and seems to
