No substitution is ever practiced, but every prescription is filled exactly as the physician wishes. The prices are fair and reasonable. Send yours there to be filled.

Celery Headache Powders.

There is not any better remedy for headache than these powders. They never fail to relieve. Made and sold only at Davis' Prescription Pharmacy.

Pollock & Credle Livery, Feed, Sale and Exchange STABLES

The CHEAPEST Turnouts in the city. No. 70 South Front Street, opposite Hotel Chatawa.

MUST COOPERATE.

Farmers Urged to Work for Good Prices for Cotton Seed.

To go to Dare County. Thompson Back in Craven Jail. Against the Seaboard. Telegraph Wire Nuisance.

RALPH, Aug. 28.—The agricultural department has directed State Veterinarian Butler to go at once from the mountain section to Dare county, to investigate the disease now raging among the horses.—A fever which is transmitted to well horses from sick ones by mosquitoes, and which is increased in the sick ones by the constant biting of the mosquitoes.

State business agent T. B. Parker of the Farmers State Alliance urges all the cotton farmers in this State to cooperate regarding the sale of their cotton seed. He says the crop of seed will be about 9,000,000 bushels, and that if the farmers do cooperate they can in all probability get 10 cents more a bushel. There will be a sharp advance in the demand for and price of cotton seed meal, to take the place of corn for feeding stock, the corn crop being short, and there will also be a very marked increase in the price of cotton oil to take the place of lard which will be necessarily made scarcer and higher by the short corn crop. Mr. Parker says that there are excellent reasons believing the American and the Southern cotton oil companies have formed or are about to form a pool to reduce or keep down the price of cotton seed and he wants all the cotton growers to be so prepared that they can get their share of the profits arising out of the increased demand.

There may be a renewal here of the plan to build a railway to the northeastern part of this county, and perhaps to Spring Hope, Nash county, to get a connection with the Atlantic Coast Line. The Norfolk and Western railway it seems to be pretty well assured, will soon be at Apex, fifteen miles from here.

The sheriff of Craven yesterday brought a white man to the criminal insane department of the penitentiary, but it is full and to day he took the man back to Craven.

A number of the merchants here are indirectly boycotting the Seaboard Air Line by writing to persons who ship their goods to ship only by the Southern Railway. They do not say they will refuse to take the goods if shipped by the Seaboard Air Line, as that would be a boycott.

The Bell Telephone Company to day began to put its wires under the ground. It is laying them in wooden conduits. The city ought to require all wires to go underground. The lines are sagging the trees, and the streets are disfigured and made dangerous by wires.

The State Superintendent of Public Instruction finds that two of the text book firms under the new contracts are flooding the State with blanks in which they prescribe the conditions for book exchanges, making them narrow and harsh. He says he will stop this matter. He laid the case before Attorney General Gilmer to day.

James White, Bryantville, Ind., says DeWitt's Witch Hazel Salve healed running sores on both legs. He had suffered 6 years. Doctors failed to help him. Get DeWitt's. Accept no imitations. S. Duffy & Co.

Wake Forest Opens.

RALPH, August 28.—Wake Forest College opened today, with an increased attendance.

The New Orphanage Building.

RALPH, August 28.—Today the trustees of the Methodist Orphanage here met and decided upon the design and plan for the \$35,000 main building. It will be of brick, 3 stories, and basement and will have a front of 180 feet and a depth of 40.

O. O. Bank, Raleigh, Ark., says: "I was troubled with constipation until I bought DeWitt's Little Early Bitters. Since then I have been entirely cured of my old complaint. I recommend them." F. S. Duffy & Co.

Islands for Sale.

MONTREAL, CANADA, August 27.—The number of islands in the St. Lawrence, in the Thousand Islands group, to be placed upon the market by the Dominion Department of the Interior, numbers 500. They are distributed over the river between Kingston and Brockville, and range from 500 acres to two or three hundred acres in extent. As soon as the plans of the islands and the conditions of sale shall be printed, offers to buy will be received by the department. In the event of two or more applications for the same island it will be sold to the highest bidder. Only two islands will be sold to the same applicant.

CASTORIA

For Infants and Children. The Kind You Have Always Bought. Beware the cheap imitations.

NEW BERN REBELS.

Said to Threaten Not to Impose Any More Fines. Special to Journal.

RALPH, August 28.—The county superintendent of instruction of Craven county writes the State Superintendent that the authorities of New Bern threaten that they will impose no more fines if there is an enforcement of the payment of the school fund of the fines imposed during the past three years by that town.

THE HORSE DISEASE.

Petty's Explanation and Remedy. Mosquito Aids Spread of Disease. Greensboro, N. C., August 28.

After careful and somewhat tedious investigation I find the enzootic existing in Hyde county and surrounding country a febrile disease peculiar to that district and peculiar to the equine species of animals. It is not contagious from one horse to another, but is inoculable from horse to horse in any way, but is rapidly carried by the mosquitoes from the sick to the well ones. The mosquitoes keep inoculating sick ones at intervals, thus rendering it rapidly fatal, as the virus is put in them more rapidly than the system can get rid of it, and soon the horse develops symptoms of congestion or inflammation of the local parts first affected and develop a high fever from 103 to 107 with great depression and weakness, and the patient soon develops brain symptoms from congestion of the spine and small portions of the brain, and the immediate cause of death in most cases is congestion or inflammation of the brain.

Post mortem examinations show primary lesions in lungs, kidneys, stomach and liver, with swellings from subcutaneous exudate at the point of inoculation. There is a rapid tissue change, as albumen is very abundant in the urine and microscopical examination of the number of red blood corpuscles and a diminution in size of those left in the blood. Some of the horses in this section are kept in a predisposed condition by feeding them on foods that contain vegetable poison; and also two plants peculiar to the eastern part of North Carolina (helenium tenneffolium, helenium autumnale), which are poisonous, and more or less loss from diseases is produced by them every year from inflammation of the stomach called stomach staggers, but none die from fever, as the plants do not produce fever or any of the above-mentioned symptoms. This disease breaks out at intervals of seven to ten years since 1867, when the mosquitoes are numerous. The above-mentioned plants and poisons only serve as predisposing causes of this fever, as a large per cent die in the infected district that have no such food, but these animals show a stronger resistance of the disease than those fed on the poisonous food.

When once inoculated the mortality of this disease would be very small were it not carried by some agent at short intervals from sick to well or already inoculated patients, or from one local point of inoculation to the uninoculated portion of the animal, and thus auto-infection is carried by the mosquitoes.

I recommend as prophylactic treatment quinine in small doses, green food internally and externally, an application twice a day of a solution of kerosene oil and crocin, mopping it on them, curative measures I recommend internally, large doses of quinine and laxatives, and externally ice and cold water applied to the head and spine.

J. W. PETTY, D. V. S.
